# 1 GUIDELINE

The fee schedule is structured to allow clients to reconcile their invoices through specific reference codes identifying each fee.

Invoicing items are subject to VAT in the case established by law. Unless otherwise specified, fees are expressed in euro and calculated and invoiced monthly, based on volumes recorded during the relevant month, and debited with a value date corresponding to the last business day of the month following the invoice date through SEPA procedure.

If a monthly (or six-monthly, annual) fee is applied to a service, in case participation or withdrawal occurs during the month (or during the year), the fee is entirely applied regardless of the date of activation or withdrawal. Monthly fees are invoiced on monthly basis, six-monthly fee are invoices in the month of activation of the service/functionality and, after, in the months of January and July whereas annual fee are invoiced in the month of activation of the concerned service/functionality and, after, at the beginning of each year, except for A2A annual fee for X-TRM which is invoiced on a quarterly basis and on a pro-rata basis in case of adhesion during the relevant quarter and for the six-monthly fee for data services which is applied on a monthly pro-rata basis in case of adhesion after the first month of the semester.

For specific requirements applicable to some public entities the invoicing may be on a semi-annual basis.

Where monthly fees are based on a volume line, each client may choose it at the service subscription and in the following year may change it by making a request before December 15th or, in case this date is not a business day, before the next business day. The line change starts in January of the following year; no change of tier/line is admitted during the year.

Where it is possible to purchase up-front slots of volume, the request shall be made within December 15th (or if this date is not a business date, the deadline is carried over the next business day) and the fee per slot is included in January's invoice. Fees applied to volumes exceeding chosen tier/line or purchased slot are included in the December's invoice of the year of reference.

Fees are not reimbursed if the client withdraws before the end of the period of reference.

## 1.1 Central Maintenance Service – custody fees

Custody fees are applied for each category of financial instruments held by Monte Titoli as Issuer CSD.

Safekeeping fees are calculated by applying rates expressed in annual basis points to the monthly average balance of the financial instruments booked in all the accounts opened by the intermediary in the service. The average monthly balance is calculated as an average of the daily balances during the month of reference. For financial instruments issued in a currency other than euro, the average balance expressed in euro is calculated by applying the daily exchange rate.

Financial instruments are evaluated according to the following criteria:

- Shares: last recorded market price or, if not available, nominal value. Shares with no nominal value (non-par value), are conventionally valued at € 0.10;
- Fixed Incomes and similar financial instruments: nominal value and, in case of bonds with pool factor, nominal value as modified based on the pool factor;
- Warrants, covered warrants and certificates: last recorded market price or, if not available, conventionally evaluated at € 0.30;
- Investment fund units and similar financial instruments: last recorded market price or, if not available, conventionally evaluated at nominal value.

Financial instruments issued by companies under insolvency proceedings are not subject to the application of safekeeping fees.

## 1.2 Settlement Service operated through T2S

Settlement fees are applied separately for activity other than CCP one and for CCP activity. CCP activity is meant as activity for the guarantee of trades and the related collateral collection/return (the so so called margins).

The settlement fees applied to settlement instructions related to non-CCP activity executed through T2S (hereinafter fees applied to intermediaries) includes matching and settlement through T2S and, for ICP intermediaries, reporting through X-TRM Service for transactions input into the Settlement Service through X-TRM Service.

The settlement fees applied to settlement instructions related to CCP activity executed through T2S includes matching and settlement through T2S and, if so requested by the CCP, the instruction enrichment.

In case of settlement instruction that can be partially settled, the fee is applied to each partial settlement.

Settlement instructions are executed through T2S in connection with:

- transactions handled by the Settlement Service
- transactions handled through the Foreign Settlement Service (debit/credit of the securities on the intermediary account held with Monte Titoli, cash pre-funding through T2S for DVP transactions)
- the execution of corporate actions on securities held by Monte Titoli (both directly and through links with other central securities depositories) with regard to the settlement of securities on intermediary's securities accounts and to the settlement of cash in T2S

Monte Titoli recovers from DCP and ICP participants T2S costs for settlement and resubmission and from DCP participants T2S information costs on the basis of costs invoiced by the ECB with reference to accounts/parties connected to the participant.

The fee for the ordinary management of the participation profile is applied to the following set up and related changes in CLIMP:

- full configuration (static data, services, parties, accounts and connectivity) on behalf of the participant through a non-urgent procedure
- anticipation of the validity date of the BIC code (assigned by SWIFT) in T2S;
- support for the configuration in T2S – for DCP clients;
- set up and changes of static data (parties, accounts, etc.);
- T2S service membership and related changes;
- set up and changes of agent banks in T2/T2S;
- X-TRM service membership (trader configuration included) and successive changes (i.e. adhesion to markets, change in the GCM or in the settlement agent, etc.).

In case of configuration and change of the above data within the provided time and without Monte Titoli extraordinary intervention the fee is not applied.

The fee for the urgent management of the profile is applied for the full configuration of the intermediary (general data, services, accounts and connectivity) on behalf of the client through urgent procedure.

## 1.3 Financial instruments management service through connection with other CSDs – custody fees

Custody fees applied on financial instruments held by Monte Titoli as Investor CSD by means of connections with other central securities depositories are calculated applying rates expressed in annual basis points to the monthly average balance of the financial instruments booked in all the accounts opened by the intermediary. The average monthly balance is calculated as an average of the daily balances during the month of reference. For financial instruments issued in a currency other than euro, the average balance expressed in euro is calculated by applying the daily exchange rate.

Financial instruments are evaluated according to the following criteria:

- Share or fund units: last recorded market price or, if not available, conventionally evaluated at € 1.00;
- Fixed incomes and similar financial instruments: nominal value;
- Warrants, covered warrants and certificates: last recorded market price or, if not available, conventionally evaluated at € 1.00 or, if managed through Euroclear Belgium, € 6,00.

## 1.4 Family pricing

Participants belonging to the same parent company may request the application of family pricing. The parent company must control directly for at least the 50% + 1 of the participant. A participant cannot be part of more than one group according to the above criteria.

The family pricing is applied for:

- Fees of the Central Maintenance Service, the Settlement Service operated through T2S and the financial instruments management service through connection with other CSDs, applied according to regressive amounts on increasing volumes; these fees may be calculated on aggregated volumes at group level and applied to each intermediary of the group based on the medium fee at group level;
- The rebate granted on fees applied for the settlement of instructions in T2S: the settlement volumes in T2S invoiced to clients of Euronext Securities (Milan, Porto, Copenhagen) can be considered at group level for the rebate application; in case of change in the group composition during the year, the volumes of the concerned participant entered or left the group are only considered for the months during which he was part of the group and the discount is applied to the participant on the invoiced settlement fees for those months

on the conditions hereinafter reported.

The parent company shall ask Monte Titoli for the application of the family pricing for itself and the controlled participants by means of a certification to be drafted according to the schema provided by Monte Titoli. This certification shall be updated any time a change occurs in the group composition (i.e. new intermediary that is part of the group or intermediary that is no more part of the group).

The application of the family pricing to intermediary that is part of a group as well as the following changes to the group composition shall be notified by the 15th day of each month and are effective:

- from the first day of the month of the communication in case of initial request of application of the family pricing to group whose composition date is effective before the 16th day of the month of communication;
- from the first day of the month following the communication in case of initial request of application of the family pricing to group whose composition date is effective after the 15th day of the month of communication;
- from the first day of the communication of the change if the change is effective before the 16th day of the month of communication;
- from the first day of the month following the communication of the change if the change is effective after the 15th day of the month of communication.

The reduction of fees, applied according to regressive amounts on increasing volumes, arising from the application of the family pricing is indicated through an amount with negative sign in the invoicing attachment relating to the custody fees.

## 1.5 Rebates

### 1.5.1 Rebate on settlement fees applied to intermediaries

The rebate on fees for the settlement of instructions in T2S is applied for annual volumes of T2S settlement instructions totally invoiced by Euronext Securities Milan, Porto and Copenhagen as indicated in the table below. Volumes related to resubmission of instructions and settlement of auto-collateral instruction are excluded from the counting of invoiced settlement instruction volumes considered for the rebate recognition.

<i>Rebate (%)</i>	<i>Annual volume of T2S settlement instructions totally invoiced by Euronext Securities (Milan, Porto and Copenhagen) to the client</i>
2.5%	from 5 million to 12 million
5%	Above 12 million

The rebate is applied in the invoicing of January on fees invoiced by Euronext Securities Milan to the concerned clients for the previous year and is reported in the invoice with the invoicing code ITSETREBIN.

For the year 2023:

- the rebate is applied on fees invoiced for the months July to December, considering the whole year 2023 for the counting of T2S settlement instructions globally invoiced by Euronext Securities for its recognition;
- as a result of the introduction of settlement fees applicable to CCPs for CCP activity as of 1<sup>st</sup> October 2023, the rebate is applied by Euronext Securities Milan to CCPs:
  - o on invoiced settlement fees for the months from July 2023 to September 2023, referring to the period from January 2023 to September 2023 for the counting of T2S settlement instructions globally invoiced for the achievement of the volumes below reported as recomputed on a pro-rata basis.

<i>Rebate (%)</i>	<i>Volume of T2S settlement instructions totally invoiced by Euronext Securities (Milan, Porto and Copenhagen) to the client from January to September 2023</i>
2.5%	from 3.75 million to 9 million
5%	above 9 million

- o on invoiced fees for the settlement of instructions of non-CCP activity for the months from October 2023 to December 2023, referring to the period from October 2023 to December 2023 for the counting of T2S settlement instructions globally invoiced for the achievement of the volumes below reported as recomputed on a

pro-rata basis. With regard to settlement instructions invoiced by Euronext Securities Milan in this counting only settlement instructions related to non-CCP activity are considered.

<i>Rebate (%)</i>	<i>Volume of T2S settlement instructions totally invoiced by Euronext Securities (Milan, Porto and Copenhagen) to the client from October 2023 to December 2023</i>
2.5%	from 1.25 million to 3 million
5%	above 3 million

### 1.5.2 Rebate on settlement fees applied to CCPs for CCP activities

In case of annual invoiced volumes of T2S settlement instructions reaching the threshold of 10 million a rebate of 45% of invoiced fee for T2S cross-CSD settlement on financial instruments for which Euronext Securities Milan is investor CSD is applied. Both settlement instructions with no enrichment and settlement instruction with enrichment are included in the computation of invoiced settlement instructions for the required threshold whereas resubmission and auto-collateral instructions are excluded.

The rebate is applied in the invoicing of the month of January on the concerned fees invoiced by Euronext Securities Milan in the previous year and is reported in the invoice with the invoicing code ITSETREBC.

For the year 2023 the threshold of volumes of instructions invoiced for the rebate recognition is referred to the period from October to December 2023 and is equal to 2.5 million of T2S settlement instructions invoiced.

# **5 SERVICES FOR THE COMMUNICATIONS MANAGEMENT AND FOR THE IDENTIFICATION OF FINANCIAL INSTRUMENT HOLDERS**

## 5.1 Reporting

For FIS, CPA and SHID intermediaries can choose between two pricing types: flat fee or sliding scale pricing.

	Fee	Invoicing code
<b>For each shareholder's data sent via FIS and/or CPA and/or SHID</b>	0.90	ITMX0005

Sliding scale pricing is applied monthly, according to the line chosen. The pricing is calculated on the basis of the overall number of names sent for FIS, CPA and SHID relating to all intermediary's accounts. The unit fee is charged to each shareholders' data exceeding the volume of the chosen line. Each name is counted once, also in case of multiple sending to correct mistakes.
