

> Reminder of TOPCAC messages 0023 and U0023 for real-time communication on Euronext Cash Markets

Euronext reminds customers of the importance of satellite dissemination messages **MMTP 0023** or **FIX U0023** (SPI Mail). This message contains real-time information for traders on the Euronext Cash Markets, which is necessary in order to follow up the NSC system.

Message 0023 is sent by the Euronext Cash Market Operations department (tel: +33 1 49 27 10 20, email: equities@euronext.com; structured.products@euronext.com) and should be displayed on the screen of every trader. It is used to send market operational information such as security halts, orderbook deletions, new listings of securities, market halts, etc.

Euronext therefore strongly recommends Euronext members and ISVs who do not yet display this message field on their traders' screens to ensure that it is implemented in their application. This feature is highly recommended in order to keep in line with the Euronext Trading Manual and with Euronext Business Continuity Plan communication policy.

Technical documentation on **message 0023 (MMTP)** is available on page 95 of the 'NSC-VE, NSC-VL and TCS Systems Market Data Message Specifications (TOPCAC)' guide, version 7.2.

Technical documentation on **message U0023 (FIX)** is available in the 'Euronext FIX Trading Interface' guide under [The Euronext applicative interface > Market data and TCS messages OUT > U0023: mail](#).

For any questions related to the implementation of message 0023 (development or validation), please do not hesitate to contact Customer Technical Support on tel: +33 1 49 27 15 60.

Kind regards,

Euronext Cash Market
