

> New version of ETW 3.2 available on the production platform

Euronext is pleased to announce that ETW users will be able to upgrade their workstations with the new release of the ETW on the production platform from Monday 15 December 2003.

IMPORTANT:

1) The upgrade of your workstation must not in any case be performed before 15 December.

2) The current release of the ETW (3.1.0.7) can still be used after 15 December but without the benefits of the evolutions included in the new release version 3.2.

This new version is only available through the Euronext Download Tool (EDT). The set up and documentation are now available for downloading.

This new ETW version will allow you to benefit from the evolutions to the Euronext Market Model (EMM) as well as new ETW functionalities such as described in the Key Points document mentioned below.

For further information concerning this upgrade you will find the following documents available on the Member Relations website:

- [Key Points Document providing Recommendations and Functional Perimeters](#);
- [Installation Guide](#);
- [User's Guide](#).

For any support regarding these new functionalities or if you have any questions regarding the installation of this new version, please contact Customer Technical Support on tel: +33 1 49 27 15 60 or email: ctsparis@euronext.com.

Kind regards,

Euronext Cash Market
