**For any questions, please contact CTS on tel: +33 (01) 4927 5050**

Internal Matching Service from Euronext Equity Markets

The new internal matching algorithm embedded in the Euronext NSC orderbook changes the price-time priority for intermediaries choosing to optimise execution of their own order flow at the best possible spread. Buy and sell orders originated by the same member firm will be executed at the best price available in Euronext's central orderbook, whenever applicable. Member firms benefit by opting out of clearing services for these trades, which are instead processed directly by the originating member firm.
