

Press release

Euronext to launch 12 new strategy indices

19 December 2007

Euronext, a subsidiary of NYSE Euronext, is expanding its offering with the launch of a new series of strategy indices to give investors more trading choices. The three new strategies, Leverage, Short and XBear will be available on the AEX, BEL 20, CAC 40 and PSI 20 from 21 December 2007.

- **Leverage indices** track the performance of a strategy which doubles exposure to an underlying index with the support of short-term financing. In situations where the market is rising, they enable investors to earn a positive return, double that of the underlying index.
- **Short indices** track the performance of a strategy that reverses exposure to the underlying index by combining a short position on the underlying index and exposure to a risk-free money-market instrument. When the market is falling, they offer a return that is positive and the inverse of the decline in the underlying index.
- **XBear indices** track the performance of a strategy similar to that of Short indices with double inverse exposure to changes in the underlying index.

These new index series reflect Euronext's commitment to providing investors, fund managers and issuers of structured products with effective tools to meet their needs and keep pace with market developments.

The new indices will be calculated and disseminated from 21 December 2007. The calculation will initially take place once a day after the close. In Q1 2008 the calculation will be made continuously throughout the trading day. From 30 December 2002, each index will have a base value of 1,000 and historical data will also be available from that date.

About NYSE Euronext

NYSE Euronext, a holding company created by the combination of NYSE Group, Inc. and Euronext N.V., commenced trading on April 4, 2007. NYSE Euronext (NYSE Euronext: NYX) operates the world's largest and most liquid exchange group and offers the most diverse array of financial products and services. NYSE Euronext, which brings together six cash equities exchanges in five countries and six derivatives exchanges in six countries, is a world leader for listings, trading in cash equities, equity and interest rate derivatives, bonds and the distribution of market data. Representing a combined \$30.3 trillion/€21.3 trillion total market capitalization of listed companies and average daily trading value of approximately \$139 billion/€103 billion (as of September 30, 2007), NYSE Euronext seeks to provide the highest standards of market quality and integrity, innovative products and services to investors, issuers, and all users of its markets.

Euronext N.V.

Euronext N.V., a subsidiary of NYSE Euronext, has successfully integrated local markets across Europe to provide users with a unified market that is broad, liquid and cost effective. Euronext is the largest central order book cash market in Europe and the second largest derivatives exchange in the world, by value of business traded.

Following the initial three-way merger of the local exchanges of Amsterdam, Brussels and Paris, Euronext acquired the London-based derivatives market LIFFE and merged with the Portuguese exchange in 2002. Euronext's unique business model incorporates the individual strengths and assets of each local market and has been implemented on all of Euronext's markets, covers technological integration, the harmonisation of market rules and the regulatory framework. The implementation of Euronext's horizontal model designed to generate synergies has proved that the most successful way to merge European exchanges is to apply global vision at a local level. Euronext's IT integration was completed in 2004, when a four-year migration plan resulted in harmonised IT platforms for cash trading (NSC[®]) and derivatives (LIFFE CONNECT[®]). As a result, every market participant now has a single point of access to trading. Euronext's IT structure was rationalized in 2005 with the creation of Atos Euronext Market Solutions (AEMS), an IT services-related vehicle between Euronext and Atos Origin which is now a leading global provider of technology services to Euronext and other global capital markets.
