

Rolfe & Nolan

Offers comprehensive processing for Liffe and other global derivatives markets via its core systems RANsys (in Europe) and RISC (in North America). Available in-house, facilities managed, or ASP, with associated database, automation and web offerings.

Rolfe & Nolan now also offer a range of middle office solutions addressing the needs of fee and commission management, risk management, margin calculation and trade enrichment.

Fees Direct – Fee calculation and brokerage negotiation tool covering exchange and clearing house charges.

Alerts Direct – Real-time post trade risk management including lot limits, impact of price changes and margin shortfall.

Margin Direct – Fast, flexible and secure ASP margin calculation tool with low cost of ownership.

Prism – Web-based program that performs a range of middle office tasks, including automatic trade claiming, predefined or uploaded allocations, exchange and client trade file loads, trade matching and reconciliation.

Edge – Java-based trading front-end. ASP delivery, ease of deployment and state-of-the-art functionality

The screenshot shows the 'fees direct' web application. The main content area displays a table with columns for 'Trade/Market', 'Market', 'Fee/Commission', 'Market Fee', and 'Last Modified'. Below this is a section for 'Recent Trades' with columns for 'Order ID', 'Status', 'Order ID', 'Order ID', and 'Last Modified'. The interface includes a top navigation bar with the 'fees direct' logo and a sidebar on the right with various icons for navigation.

The screenshot shows the 'alerts direct' web application. The main content area displays a table with columns for 'Order ID', 'Order Status', 'Order Type', 'Price', 'Position', 'Liquidation', 'Open Order', 'Order ID', 'Status', and 'Order ID'. The table contains several rows of data, with some rows highlighted in red and others in yellow. The interface includes a top navigation bar with the 'alerts direct' logo and a sidebar on the right with various icons for navigation.
