

## SunGard/GMI

SunGard/GMI provides back office processing solutions for the exchange traded derivatives industry. Clients are able to enjoy the benefits of a single, global system for all of their futures, options and exchange-traded derivatives processing.

Serving more than 25,000 customer organisations in 50 countries, SunGard is one of the world's leading software and IT services companies.

SunGard provides software and processing solutions to institutions throughout the financial services industry, higher education, and the public sector; and helps enterprises of all types to maintain the continuity of their business through information availability services.

In the software and processing arena, SunGard offers many category-leading solutions and counts among its customers the world's 50 largest financial institutions, as well as 1,600 colleges and universities. In availability services, SunGard has been an industry leader since pioneering data protection and recovery as a business more than 25 years ago.
