

Comunyteck Consultores

Comunyteck **Plug Trade** product is an integrated STP platform for trading, quoting and clearing on organized Financials Markets. It is as a set of “pluggable” modules, where each installation can be configured using just the required functionalities. Developed using industry standard technologies: Java (J2EE) and .NET (MicroSoft). The most relevant features are:

- central manager for middle-office operations in derivatives markets
- support both NCM's (Non Clearing Members) and GCM's (General Clearing Members)
- intelligent, rules-bases assignments, give-ups and give-ins acceptance
- only required transactions are sent to the cameras (omnibus camera accounts)
- allows manual entry of slips, for non electronic or unconnected cameras
- Interface to other systems
- Market Clearing Adaptors available
