

Trading Technologies International, Inc.

TTNET™: Outsource network monitoring, maintenance, support and security 24/7. TTNET is TT's full-service ASP offering for FCMs, trading firms, banks and other institutions that prefer an outsourced solution. Specially trained, highly qualified TT technicians handle all responsibilities of network administration, hardware configuration, infrastructure maintenance, data line management, upgrades, backups, security and user support. Leverage TT's vast experience and efficient IT practices to achieve superior availability, security, backup and support.

Get peace of mind about losing your connection in the middle of a trade. TTNET provides the fastest, most reliable means to trade the world's leading exchanges. With TTNET, TT manages the technical infrastructure on the customer's side of the exchange. TT staffs its network operations centres with the industry's best IT professionals and network engineers. This way traders can focus on trading, without worrying about technical hassles.

Get immediate, scalable, seamless market access. TTNET allows you to quickly deploy trading screens in virtually any country. TTNET supplies gateway connectivity and hosting services for all TT products. You also can take advantage of shared exchange circuits that save you the cost of ordering your own exchange lines.

Get unparalleled redundancy and disaster recovery. TTNET delivers maximum uptime through fast, highly resilient and fully redundant connections to the world's top futures exchanges through shared facilities in Chicago, New Jersey, Frankfurt, London, Singapore and Tokyo. TT's network is backed by service level guarantees, facilitated by TTNET's extensive global presence and state-of-the-art network operation centre. Sites are mirrored in separate locations offering extreme protection and optimal failover, even if a crippling disaster should strike.

Get lower costs and greater operational freedom. TTNET allows you to outsource 24/7 network monitoring, maintenance, support and security to TT's support specialists so that you can focus your critical resources on core business functions. It eliminates the need for capital expenditures to pay for additional space requirements, expensive build-outs and in-house IT infrastructure. You make monthly payments for service without up-front investments in servers, routers and other networking equipment and software.

TTNET™ is an approved ASP provider for Liffe providing direct access to LIFFE CONNECT®.
