

Barclays Capital

Barclays Capital is a market leader in global futures and options execution and clearing services with a large focus on innovative solutions. The in-house development of an electronic execution and straight-through reporting system has enabled Barclays Capital to extend a quality service value to clients.

BARX for futures and options trading – is a feature-rich trading and order management system that provides direct market access to the major futures and options exchanges worldwide. Consistently high ranking clearing firm on all major exchanges.

Barclays reporting – is designed to respond to clients' day-to-day requirements by permitting flexible scheduling, delivery and formatting of reports for efficient and timely reconciliation.

The use of both systems enables the client full transparency and control of their trading and clearing operations.

System features:

- DMA to over 25 exchanges
- Algo trading and Pairs trading Spreadworker
- FIX compliant
- options, spreads, strips, packs and bundles
- Turbo Deal Trading
- fully aggregated depth of market
- trade booking facility
- basket loader.
