

## Dresdner Kleinwort

Global Access to Order Routing (GATOR) is Dresdner Kleinwort's online cross-asset trading system providing access to over 30 exchanges, plus Dresdner Kleinwort's eFX trading tool.

### GATOR overview:

- Access to these electronic markets is provided with fast and intuitive functionality.
- Client support is available, providing assistance 24 hours, 5 days a week. FIX connectivity is also available.
- GATOR also provides access to our premium tool for trading FX products. Click&Trade FX™ offers an integrated approach to FX trading, order management and position-keeping.

### GATOR features:

- Single click order entry
- Full range of orders: stops, market, icebergs, fill or kill, limit
- Buy and sell orders colour-coded for ease of use
- Single click to pull all pending orders
- Full depth of market window
- Customised pre-trade risk management including clip size and tick tolerance
- Group trading functionality (shared order book)
- Full audit trail and trade history
- Customised screen layout to suit individual requirements
