

## Goldman Sachs International

### Global clearing and execution

Goldman Sachs International's (GSI) experience as a leading, global provider of derivative services is at the heart of our unique on-line straight through processing (STP) solution.

REDIPlus, our award-winning, multi-product electronic trading system, features unparalleled access to the world's major derivatives and equities exchanges, together with real-time order management facilities. Connectivity is also available via direct FIX connections from buy-side order management systems.

Trading is supported by an independent, dedicated 24-hour execution management team with full technology support. A consolidated view of your trading activity, combined with real-time market and position data, allows maximum flexibility in executing your trading strategies, fully integrated with GSI's range of post-trade services.
