

## Lehman Brothers

Direct Market Access is provided to over 30 of the world's major electronically traded futures markets through Lehman Brothers' state-of-the-art electronic order routing systems whether via FIX or a choice of front end GUIs:

- **SmartConnect**<sup>®</sup> – direct market access with flexible connectivity options
- **TradePipe**<sup>®</sup> – a proprietary front end trading system with full suite of trading algorithms
- **RealTick**<sup>®</sup> – Lehman's multiproduct front end that allows our clients to trade Equities, Futures, Options and FX.

Lehman Brothers' additional market-leading solutions include associated order book management applications, the firm's award-winning client access site, LehmanLive<sup>®</sup>, which incorporates research, analytics and our SmartClear<sup>®</sup> and EPAS futures clearing information retrieval and auto-reconciliation systems.

To complement these products, Lehman Brothers provides a high level of training, support and contingency as well as access to liquidity and specialised sales coverage for listed derivatives.

Integral to the firm's futures product offering is a range of equity and fixed income prime broker services supported by technology solutions designed to increase operational efficiencies for the firm's clients.
