

RBS Greenwich Futures

RBS Greenwich Futures, supported by a highly advanced systems architecture, provides access to multiple electronic and open outcry derivatives exchanges globally.

GreenTrade offers a fully integrated straight through processing (STP) technology, from execution to reconciliation and back office systems:

- real-time, efficient and secure order capture through a single screen
- order routing system
- access to multiple exchanges
- issuance of an electronic ticket
- tracking and risk monitoring capabilities
- trader-friendly
- average pricing facility
- fund allocation facility.

GreenScope is a continually enhanced in-house, internet-based clearing system, providing:

- five-minute intra-day updates
- immediate and secure access to account information
- built-in trade reconciliation system
- provision of data downloads onto host systems
- average pricing and fund allocation facilities
- flexible margin management through an automated payment system
- easy access to market data for efficient account monitoring.

Demonstrations of GreenTrade and GreenScope are available on request.
