

SEB Futures

(Division of Skandinaviska Enskilda Banken (publ))

SEB Futures recognises that one glove does not fit all, and to that end SEB offers clients a variety of flavours of front ends tailored to their needs

We offer

Utr@de – which is the SEB version of the well known and proven PATS system (Futures, Options)

ORC – one of the most versatile systems on the market – SEB offer direct access through Orc on line, or via Orc ExNet using the Orc Trader platform. (Futures, Options, Equity DMA, FX)

GL – one of the best known and widely used systems in the world.(Futures, Options, Equity DMA, FX)

RTEX – access to global markets from your already existing Reuters terminal.(Futures, Options, Equity DMA, FX)

If none of the above suit, SEB Futures offers another level of versatility through Ullink connectivity, incorporating ULBridge, giving SEB's clients FIX connectivity to multiple markets through SEB via a further 20 trading front ends.
