

## Fortis Bank Global Clearing NV, London Branch

Fortis is an international financial services provider active in the fields of banking and insurance services to personal, business and institutional customers and ranks among Europe's top 20 financial institutions. Fortis has a credit rating of A+ from Standard and Poors.

Fortis offers clearing on more than 60 of the world's leading exchanges for member and non-member market participants. We constantly rank among the top 3 clearers in every time zone based on amount of turnover and number of clients. Our international network provides comprehensive market access to exchange-listed, traditional and non-traditional investment instruments and alternative products, including stocks, bonds, futures and options, warrants, forex, forwards and energy.

Fortis also performs services related to underlying assets, finances derivatives and securities positions, and manages the accompanying risks. Our proprietary cross exchange and asset class correlation haircut model shows that Fortis risk-management can offer our clients substantial added value.

All our services are offered through a dedicated worldwide team of account managers located in all time zones. This global approach ensures round-the-clock coverage to our clients.

Electronic trading has evolved rapidly over the last few years, and Fortis has stayed at the forefront of these changes. We are able to offer clearing services, risk management, custody and market access to proprietary traders, bureaux, brokers, market makers and hedge funds. Our clients have the flexibility of using either Fortis exchange memberships or their own exchange memberships to trade these markets.
