

**REGISTRATION FOR TESTING ON EUA PLATFORM FOR
THE NEW WARRANTS & CERTIFICATES MARKET MODEL ***

The main purpose of the new Warrants & Certificates market model is to improve price quality and to develop features more adapted to a market that is driven by LP quotes.

As several new technical messages have been developed for Liquidity Providers a conformance test is strongly recommended for Liquidity Providers who wish to have access to the new Warrants & Certificates market. The new model has less of a technical impact on brokers. Please verify with your software provider if their software package will support the new Warrants & Certificates market model. This conformance test will be conducted on the EUA test platform.

This registration form must be used to schedule a date and time to perform the conformance test together with NYSE Euronext's Customer Technical Support (CTS) team.

In order to test the behavior of a client's application on the new Warrants & Certificates market model on the EUA platform, please return this form by fax to: +33 (01) 4927 5055.

CTS is at your disposal to perform the conformance test and to answer any related technical questions. CTS can be contacted by telephone on +33 (01) 4927 5050 and via e-mail at cts@euronext.com

** This service offer is currently pending regulatory approval.*

Preferred date and time

Preference for the following week: _____

Preference for the following date and time: _____

As a reminder, please be informed that the test platform is available for your internal testing as of 2 June 2008.

The test script can be scheduled as of 9 June 2008. CTS strongly recommends that clients perform the test script as early as possible.

CTS will take into account your date preference and will contact you to inform you if the proposed date and/or time are available. If the date or time is unavailable CTS will propose a new one.
