

Charm B.V.

Since 1997, Charm offers products and services to financial institutions, varying from high-performance trading and order routing systems for banks, specific customised trading tools for traders, to system integration projects for financial institutions.

Charm has great expertise in the financial world and is focused on providing excellent service. This makes Charm a trustful partner for the development of your trading environment. Our products are used by prominent banks, brokerage and trading firms.

Charm InterFIX

Charm InterFIX is the central component in our robust client-server architecture. The open InterFIX structure enables you to easily connect routing and trading systems to other applications, such as risk-management systems, broker networks, external users and other exchanges. Charm InterFIX offers high performance throughput and flexible extension possibilities via a broad range of interfaces.

Charm Trader

Charm Trader is an intuitive, extremely fast and reliable trading application, containing all relevant features for traders and brokers.
