

**EasyScreen DataCentre - The RIGHT technology at the RIGHT price . . .** The EasyScreen Data Centre houses a full package Order Routing, Risk Management and Front-End Screen trading solution. It is available NOW for your instant connectivity.

### Easy Access

A trader can access the Data Centre from anywhere, trading seamlessly on his/her personally configured EasyTrade or EAT screen, from any location in a high security environment.

### Easy Connectivity

You can have the connectivity you want, instantly, at the flick of a switch. Screens can be rolled out to traders, rapidly and easily, under your own banner.

### Easy Administration

Trader accounts can be rapidly set up and easily administered using the Data Centre housed administration and risk tools.

### Easy Advantages

Safe within the IBM high security environment of the London facility, the Data Centre houses a full ASP trading Solution. It uses our core EasyRouter technology, protected by EasyShield pre-trade risk management and running either EasyTrade or Easy Active Trade ('EAT') front-end trading screen. You can connect to the Data Centre by private networks, Internet or by leased line, we can even manage your network for you.
