Trading Technologies (TT) develops high-performance trading software for derivatives professionals. TT maintains a worldwide presence with offices in Chicago, London, Frankfurt, Geneva, New York, Stamford, Houston, Singapore, Hong Kong, Tokyo and Sydney with clients among the world’s premier investment banks, hedge funds, securities brokers and trading institutions.

## X\_TRADER®

The ultimate in trading screen performance, X\_TRADER gives professional derivatives traders the edge with superior speed, stability and accuracy. Loaded with advanced trading strategy support - including TT’s Autosreader®, Autotrader™ and X\_TRADER® API™ as well as additional powerful tools to further optimize your trading performance. Supremely reliable and reflex-fast X\_TRADER is the front-end choice for professional derivatives traders seeking the flexibility to trade anytime, anywhere.

## X\_RISK®

X\_RISK offers comprehensive user administration and risk monitoring that dynamically displays current position, P&L and working orders for each trader. It provides an accurate view of a trader’s or trading group’s current risk exposure.

## X\_STUDY™

X\_STUDY, TT’s trader-centric charting platform provides charting and analytics fully integrated into the TT software architecture. X\_STUDY incorporates traditional charting tools as well as numerous features that are unique to TT. These include innovative capabilities such as TT CVD™ (Cumulative Volume Delta) analysis, new ways to chart spreads and advanced data elements. Chart the prices you trade.

## TT Trainer™

Whether developing new trading models or assessing the skills of a new trader, firms running TT Trainer can perfect their trading technique by tracking real products in real markets- while trading them in the safety of live simulation. The ideal system to test trading strategies before applying them in real markets.

## TTNET™

TTNET is TT's fully-managed hosting solution for FCMs, trading firms, banks and other institutions that prefer an outsourced solution. TTNET allows customers to easily distribute trading screens to traders around the world from hubs in London, Frankfurt, Chicago, New Jersey, Singapore and Tokyo. Built on a multi-gigabit fiber optic backbone, TTNET delivers maximum uptime through fast, highly resilient and fully redundant connections to the world's top futures exchanges. Leverage TT's vast experience and efficient IT practices to achieve superior availability, security, and support...so you can focus on trading!
