

New and innovative Trading services

The NYSE Euronext offers new innovative services that respond to the evolving needs of the market.

Based on client consultation, NYSE Euronext has prepared new services to continue offering the most cost-efficient trading services to its clients:

- **NYSE Euronext welcomes 2 new venues fully supported by the UTP and immediately accessible to existing customers:**

NYSE Arca Europe: A new MTF extending trading on all Europe's most liquid stocks with just one connection., It is easy to access, ultra- fast and available at a competitive price

SmartPool: A new dark pool dedicated for block trading on the main liquid European stocks

In a challenging economic environment, NYSE Euronext sees this unhampered connectivity as a major selling point for customers, creating cost synergies and increasing business opportunities without complex technological hurdles.

- **NYSE Euronext has enhanced its regulated markets with new features:**

Internal Matching System (IMS): A service based on new innovative algorithmic optimising matching facilities our clients in the orderbook, who benefit from NYSE Euronext's deep pool of liquidity while reducing costs considerably throughout the whole value chain.

Trade publication and transaction reporting service: A one-stop shop publication service for all European securities allowing transactions to be published and reported to the relevant competent authority. This service is completely in line with the MiFID transparency rules.

Broker volume: New statistic tool coming soon.
