

### **Convenient, reliable & cost-effective access to the world's leading electronic markets**

RTS's global market access solution lets you trade multiple asset classes on the world's leading trading venues - without the need for complex dedicated infrastructure and support.

By using our redundant hosted architecture, located in state-of-the-art hosting & proximity centers you can access local and remote exchanges and other trading venues, hassle-free.

Our hosting & proximity centers offer additional benefits in terms of network optimization. With proximity hosting, your trading software is run locally, thus minimizing network latency and improving execution.

### **Proximity Hosting Services and Benefits:**

- Rapid access to a wide range of European, North American and Asian Markets from RTS datacenters in Chicago, New York (NYSE Arca access via SFTi connection through both of our U.S. datacenters), London (Euronext LIFFE DMA available), Frankfurt and Singapore coming soon
- No additional infrastructure and support costs for access to markets on the RTS network
- No capital investment in server hardware
- Fast access to all major global liquidity pools and trading venues
- Offers lowest possible latency through high bandwidth connections for high frequency traders
- RTS can be your one stop solution for all trading needs across all asset classes

### **Management & Support:**

- Professional technical and functional support is available through our global team 24/6
- Trade from your office or home using remote desktop technology. Utilize the same trading screen set-ups wherever you sit
- Easily add traders and trading destinations
- Familiarize yourself with new products and exchanges by using RTS's training and simulation environments before going live
- Software and hardware maintenance, support and upgrades are handled by RTS.
- All hardware is owned, maintained and upgraded by RTS as part of our service (excluding dedicated customer environment projects)

### **Direct Exchange Access:**

- Gateways to over 100 exchanges, broker networks and liquidity pools provide flexibility to connect wherever trading opportunities develop of which nearly 60 are available in our global datacenter network
