

## NYSE Arca Europe extends European trading scope

### **Trading members benefit from 334 additional large and mid cap stocks**

NYSE Arca Europe adds 334 large and mid cap stocks to its current instrument list, further broadening its proposition covering 13 leading European indices.

From today, members of the pan-European Multilateral Trading Facility (MTF) can trade a total of 794 stocks via its ultra-low latency Universal Trading Platform.

Virginie Saade, Head of NYSE Arca Europe, commented: "The considerable extension of our trading offer was developed in close cooperation with our clients. It reflects our ambition to capture the growing interest from the European trading community and to build on the recent success in certain local markets, for example Sweden and Denmark."

Fabien Serve, Business Development Manager, NYSE Arca Europe added: "We believe this extension improves our value proposition and provides new opportunities for trading members of our platform, further strengthening our position in Europe."
