

23 October 2009

PROJECT: **Universal Trading Platform for European Cash Markets**

## Universal Trading Platform Market Data Refresh Service available in production as of 26 October 2009

NYSE Euronext is happy to confirm that the Universal Trading Platform Market Data (UTP-MD) Refresh Service will be available in the production environment as of **Monday, 26 October 2009**.

The Refresh functionality, which enables customers to retrieve data from the day's trading activity, is **available for the Regulated Markets for Bonds, Equities and ETFs**. It is also available for **European stocks for trade publication/transaction reporting purposes**, as well as for **SmartPool (multicast groups 101, 102, 103, 104, 108, 110 and 111)**. As a reminder, the Refresh functionality is of particular use when a customer makes an intra day start to trading, experiences a large interruption in the real-time data feed (gap), sees a delay in the RTS retransmission or when RTS retransmission fails.

As a reminder, specifications for the refresh server ("**Universal Trading Platform Market Data – European Cash markets, v2.1**") are available on the Euronext website in the following location:

[www.euronext.com/cash/members](http://www.euronext.com/cash/members) > Market / IT documentation > Technical

For further information regarding the Universal Trading Platform, please do not hesitate to contact your local relationship manager or liaise with the Universal Trading Platform Support Desk:
