

## NYSE Arca Europe introduces market data tool on website

### Trading members benefit from real-time market data free of charge

NYSE Arca Europe has launched a new market data solution on its website, making it easier for trading members to follow the market activity on its eleven pan-European markets.

The new solution has been developed to introduce comprehensive trading data on stocks traded on NYSE Arca Europe.

**Fabien Serve**, Business Development Manager, NYSE Arca Europe said: "This new market data solution further enhances our client proposition, helping market participants to access real-time detailed trading activity."

The following real-time features are available:

- global activity (turnover and amount of shares)
- most active stocks (overall and per country)
- market summary for stocks traded including last, open, high and low price
- order book with last bid and ask including best limits
- codes and classification
- general market data (last, volume, turnover and capitalisation)

The service, provided by NYSE Euronext Data Solutions, is free of charge and easy to access via NYSE Arca Europe's website:
