Financial profile

Diversified revenue generation models

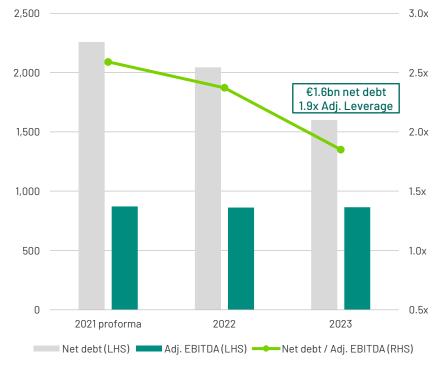

2024 cost guidance

- In 2023, underlying expenses excluding D&A were positively impacted by a one-off accruals release of €6.3 million and by a positive impact of €11.4 million from the NOK depreciation. Consequently, Euronext reported €610.0 million underlying expenses excluding D&A in 2023, compared to an initial guidance of €630 million.
- In 2024, Euronext will continue its costs control policy and expects that savings and synergies will offset inflation and 2023 costs ramp-up. As a result, Euronext expects its 2024 underlying expenses excluding D&A to be around €625 million, including around €10 million to finance growth projects and excluding potential impact from FX over the year.

Financial objectives are internal objectives of the Company to measure its operational performance and should not be read as indicating that the Company is targeting such metrics for any particular fiscal year. The Company's ability to achieve these financial objectives is inherently subject to significant business, economic and competitive uncertainties and contingencies, many of which are beyond the Company's control, and upon assumptions with respect to future business decisions that are subject to change. As a result, the Company's actual results may vary from these financial objectives, and those variations may be material.

Efficiencies are net, before tax and on a run-rate basis, ie taking into account the full-year impact of any measure to be undertaken before the end of the period mentioned. The expected operating efficiencies and cost savings were prepared on the basis of a number of assumptions, projections and estimates, many of which depend on factors that are beyond the Company's control. These assumptions, projections and estimates are inherently subject to significant uncertainties and actual results may differ, perhaps materially, from those projected. The Company cannot provide any assurance that these assumptions are correct and that these projections and estimates will reflect the Company's actual results of operations
