

Developed World Total Market

The Euronext Developed World Total Market Index Family is designed to represent performance of a set of small, mid cap, and large cap stocks across 23 developed markets. The Index covers at least 98% of the free float market capitalisation of global developed markets and across each country, ensuring extensive coverage across each country.

List of eligible countries			
Australia	France	Japan	Spain
Austria	Germany	Netherlands	Sweden
Belgium	Hong Kong	New Zealand	Switzerland
Canada	Ireland	Norway	United Kingdom
Denmark	Israel	Portugal	United States
Finland	Italy	Singapore	

The index is calculated in euro and rebalanced quarterly.

The constituents of the index are weighted according to their free float market capitalisation ensuring replicability through liquidity screening.

Reference benchmarks

Euronext has also launched a broader suite of indices covering 98% of the floating market capitalisation of their respective universe. These indices are following the same principles as the Euronext Developed World Total Market Index.

- Euronext Developed Europe Total Market Index
- Euronext Developed Eurozone Total Market Index

- Euronext Developed Asia Pacific Total Market Index
- Euronext Developed Asia Total Market Index
- Euronext Developed Pacific Total Market Index
- Euronext USA Total Market Index
- Euronext Canada Total Market Index
- Euronext Japan Total Market Index
- Euronext Switzerland Total Market Index
- Euronext UK Total Market Index

The Euronext Developed World Total Market suite of indices offers standard small, mid cap, large cap and investable market indices.

Key Features

Global Coverage

Gain exposure to the world's foremost developed markets. Our indices are designed to represent the pulse of the global economy, covering 5403 constituents across 23 developed nations. Offering a broad spectrum of investment opportunities.

Free Float Market Capitalisation

Our selection and weighting process is based on Free Float Market Capitalization, focusing on public ownership to ensure fair representation. This approach provides a more accurate reflection of market movements and highlights stocks that are actively available for trading.

Transparent Methodologies

Our suite of indices adheres to a transparent methodology, ensuring the reliability and accuracy of our benchmarks. Transparency is paramount, enabling market participants to make informed decisions when selecting appropriate benchmarks.

Index Calculation and Rebalancing

The index is calculated in euros and undergoes quarterly rebalancing. Constituents are weighted according to their free float market capitalization, with liquidity screening to ensure replicability.

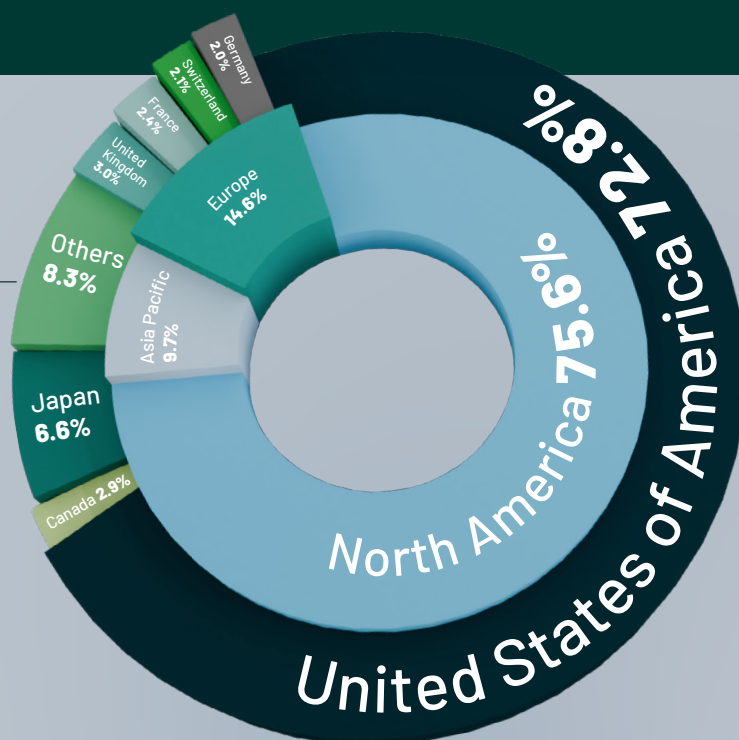

Customization

Our suite of indices can serve as "mother indices" offering a robust foundation for customization. Whether you're looking to create ETFs, mutual funds, structured products, or custom indices, we provide flexible options to align with your specific strategies.
