## Mini Options on German stocks

Mini Options. Accessibility Meets Opportunity.

Following the successful launch of Mini Options on French and Dutch stocks, Euronext further expands its derivatives offering by introducing an innovation to the market: Mini Stock Options on leading German underlyings.

With this launch, Euronext aims to unlock new trading flows from both retail and institutional investors by offering alternative products that enable more granular exposure and effective hedging on high-value German stocks.

# Mini German Options available on Euronext

Listed on Euronext Amsterdam, Mini German Options have a contract size of 10 shares and co-exist alongside the already traded and well-established standard options which have a size of 100 shares.

- Leverage Euronext's Optiq® trading platform for enhanced performance and low latency
- Benefit from robust risk management capabilities with an efficient risk model powered by Euronext Clearing
- Supported by dedicated market makers committed to providing continuous liquidity on the markets, including:

# Key benefits of trading Euronext Mini German Stock Options

Mini stock options offer greater flexibility for investors with a limited risk appetite. Their reduced size provides more control over exposure.

**Lower outlay:** Mini options require less capital – approximatively one-tenth of what is needed for a standard contract. Investors can trade high-value stocks without needing large upfront investments.

**Ideal for hedging odd lots:** Mini options are useful for investors holding odd lots (fewer than 100 shares) of high-priced stocks. They are precise for hedging strategies such as like buying protective puts or writing calls by closely matching the actual number of shares held.

**A valuable tool for limited capital:** Mini options open access to premium stocks without large financial commitments.
