

EMPOWERING 
SUSTAINABLE GROWTH

Euronext® Eurozone ESG Large 80 Index

Powered by Moody's ESG Solutions

The world is undergoing a profound shift away from fossil fuel energy sources and towards a low carbon economy. This transition is reshaping both geopolitical and economic dynamics, creating risks and opportunities for market players to manage across their investments.

Euronext and Moody's ESG Solutions have partnered to create a new ESG index. Powered by Moody's ESG Solutions data, the **Euronext® Eurozone ESG Large 80 Index** shows the performance of 80 Eurozone Large Cap companies selected for their ESG and Energy Transition performance.

MOODY'S | ESG Solutions

A Climate Action Index

The Euronext® Eurozone ESG Large 80 Index (ESG80), powered by Moody's ESG Solutions, selects the highest-ranking companies from their sector supporting the transition to a low-carbon economy and reducing climate impact with a minimum score of 30, and excludes:

- The 20% lowest-ranking companies in terms of Social assessment
- The 20% lowest-ranking companies in terms of Governance assessment
- The companies facing critical controversies with regards to the UNGC
- The companies involved in coal, tobacco or weapons

Developed with input from key market participants, the index strives to maintain replicability:

- Liquidity is preserved due to the free float market cap weighting of the components that are selected within the 300 highest free float market caps in Eurozone
- The index targets the sectorial repartition of the Reference Index Universe (Euronext Eurozone 300 index)

Index Methodology

Social

The 20% lowest-ranking stocks based on the Moody's ESG Solutions Social assessment are excluded.

Governance

The 20% lowest-ranking stocks based on Moody's ESG Solutions Governance assessment are excluded.

-80 > 90
Stocks

Global Compact

Stocks facing critical controversies related to the UN Global Compact. Companies with any involvement in **tobacco, landmines or cluster munitions** are also excluded. Stocks that are assessed as **non-communicative with regards to the Global Compact** are also excluded.

-15 > 20
Stocks

Coal

Stocks with any involvement in Coal activities are systematically excluded.

-15
Stocks

Energy Transition

The best performing stocks with a minimum score of 30 in terms of their Moody's ESG Solutions Energy Transition assessment are then added to align as closely as possible with the ICB Super Sector repartition of the reference index Euronext Eurozone 300.

→ Euronext Eurozone ESG 80 Large Index

Exposure To The Eurozone Sustainable Economy

Associated Derivatives instruments

Euronext is developing a suite of derivatives contracts on the Euronext® Eurozone ESG Large 80 index, beginning with a Future contract and now with Standard and Mini Options. These will provide investors with effective hedging tools while offering the opportunity to take exposure in the Eurozone sustainable economy, benefitting from the advantages of clearing efficiencies at the portfolio level.

Product creation opportunities

The Euronext® Eurozone ESG Large 80 index family is also available for index licensing to serve as an underlying for your **Structured Products, Exchange Traded Funds (ETFs)**, and Exchange Traded Products (ETPs).
