EURONEXT

Euronext Stream

The future of real-time market data, in the cloud

Euronext Stream is the new family of cloud-based market data solutions, designed to give firms of all sizes fast, flexible and reliable access to Euronext's markets.

With Euronext Stream, you receive up-to-the-millisecond market data directly from Euronext's trading venues through modern cloud technologies.

Two powerful ways to connect

Euronext Stream PRO

Built for enterprise-grade data pipelines and high-volume environments.

- Kafka® feed delivery
- High-throughput, fault-tolerant streaming
- Optimised for real-time trading and analytics
- Persistent streams to easily recover data
- Secure, cloud-hosted distribution.

Euronext Stream API

Designed for modern apps, dashboards, and SaaS platforms.

- Lightweight, easy-to-use WebSocket feed
- JSON format for fast integration
- Highly granular queries - from full market to single instrument
- Ideal for web, mobile, and cloud-native architectures.

One cloud. All Euronext markets.

Access comprehensive coverage across all Euronext asset classes through a single cloud-based access point - with flexible channels and market depth options tailored to your needs.
