

# Basel III Final Standards reporting

Dear Customer,

please find below the figures relating to the CC&G Equity/Equity Derivatives Default Fund, obtained under both SA-CRR and CEM Approaches, with reference date **26<sup>th</sup> February 2021**.

**Table 1** shows data for Capital Requirement calculation, obtained through the new SA-CRR methodology (s.c. *final standards*).

Financial Institutions will adopt this methodology from June 2021. *C-factor* under SA-CRR is obtained according to the formula set out in article 308 paragraph 2 of Regulation EU 575/2013, as amended by art. 1 of Regulation EU 876/2019.

**Table 1. Figures for Capital Requirements under SA-CCR (*final standards*)**

SA-CCR		
Calculation element	Value	Description
Kccp	€ 1.644.089,41	Hypothetical capital
DFcm	€ 1.307.145.000,00	Sum of pre-funded default fund contributions
DFccp	€ 4.790.135,00	Amount of prefunded financial resources that is required to use before using the default fund contributions of the remaining clearing members
DFcCM	€ 1.525.185.000,00	Sum of clearing members' contractually committed default fund contributions
<b>Total amount of initial margins</b>	<b>€ 1.960.717.500,00</b>	<b>Total amount of initial margins</b>
<b>c-factor</b>		<b>0.16%</b>

**Table 2** shows data for Capital Requirement calculation, obtained through CEM methodology (s.c. *interim rules*).

This last is the methodology currently in place and will remain applicable until June 2021. It provides the same figures sent by CC&G to participants through its ICSW/BCS systems, within 5 days from the end of each month.

---

## Basel III Final Standards reporting

C-factor under CEM is obtained according to the original formula set out in article 308 paragraphs 2-3 of Regulation EU 575/2013.

Table 2. Figures for Capital Requirements under CEM (*interim rules*)

CEM		
Calculation element	Value	Description
Kccp	€ 0,00	Hypothetical capital of the CCP
DFcm	€ 1.307.145.000,00	Sum of pre-funded default fund contributions
DFccp	€ 4.790.135,00	Amount of prefunded financial resources that is required to use before using the default fund contributions of the remaining clearing members
N	49	Total number of clearing members
$\beta$	0.33	Concentration factor
DFcCM	€ 1.960.717.500,00	Sum of clearing members' contractually committed default fund contributions
Total amount of initial margins	€ 2.930.252.126,00	Total amount of initial margins
<b>c-factor</b>		<b>0.21%</b>
