Notes

1. While the trade invalidation at a Member's request facility is restricted to options contracts, an exception is made for futures contracts which have been executed as cross transactions or wholesale trades, for which the facility is also available.

2. Minimum volume thresholds apply to Large-in-Scale Trade Facility, whether done on an outright or a strategy. The minimum volume thresholds are published on the Euronext website in the document: Euronext LIS thresholds. This document contains the thresholds for immediate publication "LIS pre-trade".

3: RFC (Commodities): In relation to RFC responses at the same price as the RFC Initiator price, responders will share a pick up percentage of up to 25%.

4: RFC (Equity and Index Options): In relation to RFC responses at the same price as the RFC Initiator price, responders will share a pick up percentage of up to 60%.

5: RFC response period: 5 seconds (Commodities) and 1 second (Equity and Index Options).

Pricing

6. Daily Settlement price (TP2.2): the Official Closing Price method is used for Single Stock Futures Contracts (all Markets) and AEX®, CAC 40® and PSI 20® Index Futures Contracts (respectively, the Amsterdam, Paris and Lisbon Markets). The Central Order Book Price method is used for all other Futures Contracts.

7. The minimum tick size on LIS can be lower than COB

8. Euronext validates all trades against one of the price methods below:

Price Validation, based on:	Fair Value	Within daily High/Low	Within lifetime High/Low
Against Actuals	x	✓	x
Exchange for Swaps	x	x	✓
Exchange of Options for Options	x	x	✓
Large in Scale	✓	✓	x

Part II Orders

Order Types (TP 3.2.3)	Limit Order	Market Order
Amsterdam Futures Market:	✓	✓
Amsterdam Options Market:	✓	✓
Brussels Futures Market:	✓	✓
Brussels Option Market:	✓	✓
Lisbon Future Market:	✓	✓
Oslo Futures Market:	✓	✓
Oslo Option Market:	✓	✓
Paris Futures Market:	✓	✓
Paris Option Market:	✓	✓

Notes:

All order designations specified in Trading Procedure 3.2.4 apply to all Contracts, with the exception of "Good in Session" that applies only to the contracts where an evening session is organised **and to the OBX Index future**.

Part III Large-in-Scale Transaction ID

1. Euronext Matching Engine supports anonymity by matching on the basis of a three character alphanumeric password agreed between the counterparties. Different passwords may be used, for instance, to differentiate between trade legs with different counterparties.
2. When submitting a trade intention each of the responding counterparties shall enter the LIS Transaction ID in the LIS Transaction ID field. This LIS Transaction ID must be populated by the responding counterparties or by the user's or by the user's ISV application, using the value provided to the Initiator by the exchange.
3. The LIS Transaction ID is generated by the exchange, and is provided back to the initiator in the response to their message.
