EURONEXT CLEARING

2)   VALUATION PRICE ("market value" determination)

Government securities shall be valued using the prices of trades executed or quotations available on the MTS market at the moment of the valuation. CC&G reserves the right to use a different price if it is considered more representative of market conditions.

3)   HAIRCUT CLASSES ("margin value" calculation)

Deposited financial instruments are divided in "classes" according to:

- the criteria adopted for Margining purposes (duration or instrument peculiarity), for Italian financial instruments;
- the duration/residual time to delivery, for the other financial instruments.

To each "class" corresponds a predefined haircut percentage.

Class definition and their corresponding haircuts are periodically reviewed by CC&G and made available on its website www.euronext.com/en/post-trade/euronext-clearing.

"Margin value" of each financial instrument is calculated by curtailing the "market value" – determined as indicated at point 2) – of the haircut percentage associated to the class in which the financial instrument is included.

4)   Concentration Limits (determination of the value of the "used Collaterals")

The value of the "used Collaterals" is determined as sum of the collateral value of deposited securities taking into account two maximum concentration limits calculated as:

- ratio of the sum of the "collateral value" of securities deposited and the calculated Initial Margins, to which a limit of 50% is applied;

- ratio of the sum of the "collateral value" of deposited securities of a single Country and the Initial Margins calculated, to which the following limits are applied:

Eligible Countries	Country limit
Italy	45%
Austria	45%
Belgium	45%
Finland	45%
France	45%
Germany	45%

EURONEXT CLEARING

Ireland	45%
The Netherlands	45%
Spain	45%
Portugal	45%
Europe	45%

CC&G reserves the right to change the above percentages for the purposes of risk management, with urgent Notice distributed through its website www.euronext.com/en/post-trade/euronext-clearing.

The maximum amount that can be deposited for each issue of BTP Italia, BTP Futura and EU 'Sure' bonds is indicated in the website www.euronext.com/en/post-trade/euronext-clearing. This limit is applied to each Clearing Member considering all its accounts (including segregated accounts).

5)   **FREQUENCY**

Margin value shall be recalculated when the Intraday Margins are computed and at the end of the trading day.

FINAL SETTLEMENT OF THE CONTRACTUAL POSITIONS OF THE AGRICULTURAL COMMODITY DERIVATIVES SECTION IN CASE OF DEFAULT

Normative references: Article B.6.5.6 of the Instructions and Article B.6.2.1 of the Regulations.

1) CONTRACTUAL POSITIONS NON-IN DELIVERY

Pursuant to Article B.6.2.1, paragraph 1, letter c), ii of the Regulations, in case of high illiquidity of the Market, the Contractual Positions other than the Contractual Positions in Delivery are settled in cash following assignment of these Contractual Positions to another Member or other Members with corresponding Contractual Positions of the opposite sign, identified on a random basis.

The cash settlement is made by closing the position at the daily settlement price of the Futures and by payment in favor of the matched Members and to the detriment of the defaulting Member of the following amount:

Daily settlement price x Number of Positions x size x Y

Where:
Size = number of tons underlying the single contract;
Y = current margin interval applied to the contract.

2) CONTRACTUAL POSITIONS IN DELIVERY

Pursuant to Article B.6.2.1, paragraph 2, letters a) and b) of the Regulations, in case of default due to failure to attest the complete or partial covering of sales positions, and in cases of failure to make final settlement due to the quality of the underlying, CC&G proceeds to the cash settlement of the positions in delivery that led to the failure. The amount of the cash settlement is calculated as:

PS x Number of Matched Positions x size x Y   [1]

Where:
Size = number of tons underlying the single contract;
Y = current margin interval applied to the contract.
PS = maximum value between the settlement price (P_T) and the daily average of the last three settlement prices of the Futures contract (P_M).

Borsa Italiana may establish a different value of PS (PS*) taking account of any other objective element that may be available to the Market, including the price conditions prevailing on physical and futures markets. In this case the settlement amount is calculated as the maximum value between the amount [1] and the amount calculated as follows:

(PS* – PT) x Number of Matched Positions x size

CASH SETTLEMENT IN CASE THE BUY IN AGENT DOES NOT SUCCED IN BUYING THE SECURITIES

1. Share and Equity Derivatives Sections

The amount of the Cash Settlement is equal to, for each Non-Derivative Financial Instruments, the highest of the following two amounts:

All *Non-Derivative Financial Instruments* with the exception of convertible bonds

Amount A

(number of securities / x reference price[1]) x Y[2]

> [1] of the day preceding the day on which the buy- in is executed. Generally S+4 only for shares, S+7 for the Financial Instruments other than shares.

> [2] Y = equal to two times the margin interval applied to the "Share Section", with a minimum of 10%.

Amount B

(number of securities / x reference price [1]) - (Original counter value of the position)

> [1] of the last day in which the Buy-In Agent may buy the securities. Generally S+7 only for shares, S+10 for the Financial Instruments other than shares. Pursuant to Article B.7.1.3. paragraph 9 of the Instructions, this amount is paid to the Member *in bonis* on the same day (including where the position of the Member *in bonis* has not reached end of validity).

Convertible bonds

Amount A

(nominal value / x reference price1 + accrued coupon[1]) x Y [2]

> [1] of the day preceding the day on which the buy- in is executed. S+7

> [2] Y = equal to two times the margin interval with a minimum of 10%.

Amount B

(nominal value / x reference price [1] + accrued coupon[1]) - (Original counter value of the position)

> [1] of the last day in which the Buy-In Agent may buy the securities, (generally S+10). Pursuant to Article B.7.1.3. paragraph 9 of the Instructions, this amount is paid to the Member *in bonis* on the same day (including where the position of the Member *in bonis* has not reached end of validity).

CASH SETTLEMENT IN CASE THE BUY IN AGENT DOES NOT SUCCED IN BUYING THE SECURITIES

3. **Extraordinary procedure for Non-Derivative Financial Instruments that are unavailable for settlement (settlement of cash difference).**

For Non-Derivative Financial Instruments unavailable for settlement, CC&G calculates the amount of the cash settlement as follows.

(Number of securities/shares x Last price available[1]) - (Original countervalue of the position)

[1]   Such price shall be communicated in advance to CC&G. As examples, this means: the reimbursement price for bonds; the OPA price for shares subject to squeeze-out.

4. **Recovery of the differentials**

The amounts due from the Member *in malis,* calculated on the basis of the indications of the previous paragraphs, must be increased to take account:

- of the differential between the countervalue of the positions *in malis* and *in bonis* that are not settled under the liquidation system. The two positions can have a different countervalue because of resulting from trading operations with different prices in the course of the same trading day or on different days;

- of the differential between the amount of the Cash Settlement of the position *in malis* and the position *in bonis.*

CC&G shall allocate such differential to the Member *in malis* pursuan to Article B.7.1.3, paragraph 11of the Instructions.
