1. TABLE OF FEES

VP performs monthly invoicing of participants as defined in the Participant agreement and VP's general terms and conditions it calculates the invoiced fees according to the published VP table of fees that is current for the invoiced period.

This table of fees document is applicable from the date indicated on the cover page until it is superseded by a new published VP table of fees. This document presents the table of fees according to business groupings of service fees-i.e. issuance, safekeeping, settlement etc. This is visible in the table of contents of this document.

1.1.Fees and Units listed in this document

The service fees listed in VP's table of fees can be flat fees or different types of variable service fees. These are defined in the "units" of the service fees.

Flat fees: Payment is per service occurring during the invoiced period, at the rate and frequency specified for the unit of the fee item.

Variable fees: Depend on the number of units recorded by VP during the invoiced period.

1.2.Monthly income

The participant will receive each month an invoice listing the services fees incurred during the month, as well as a statement of the total amount due.

The participant's functional set-up choices for their business activities, their functional hierarchy, will determine how the monthly invoice provides them with a greater or lesser level of invoicing granularity.

At the level of each service fee listed in the table of fees, the monthly invoicing granularity is identified under the heading "Invoiced to".

The calculation rules applying to the service fees are defined in each section or at the level of the service fee itself. For example, it will be specified that a fee defined in basis points per annum will be invoiced on a monthly basis at 1/12 of the stated price.

If a monthly invoice is for less than DKK 100, payment will be collected and invoiced when the amount exceeds DKK 100, but at least once a year.

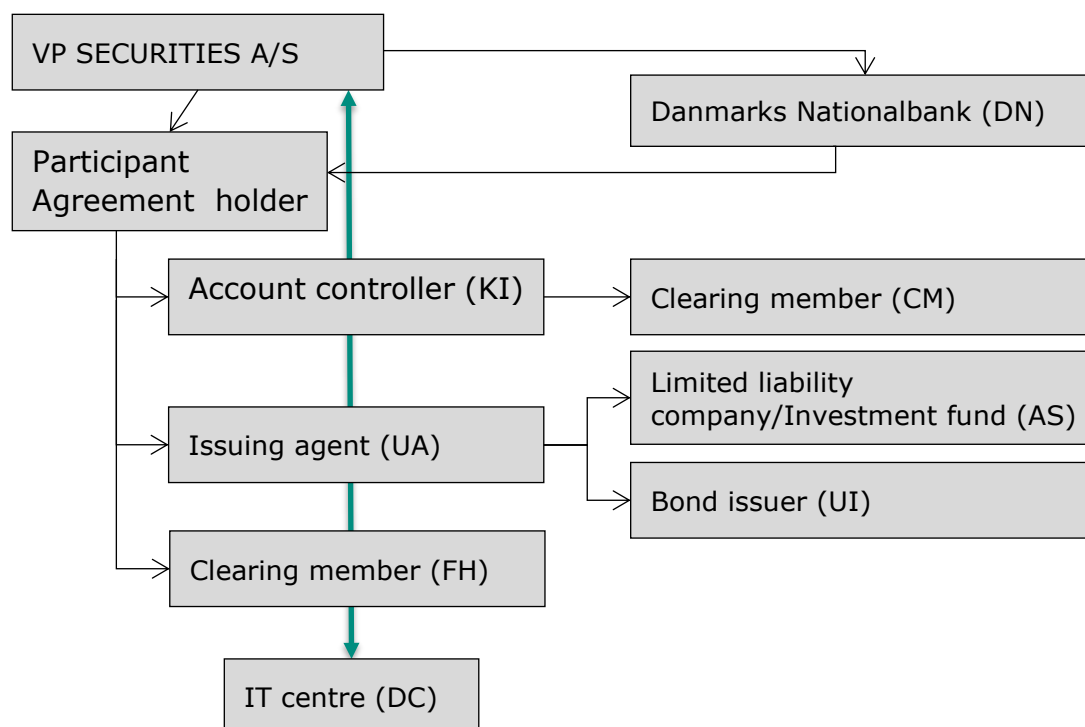

For any questions relative to the table of fees or received invoices, please contact:

1.3. Graphic illustration of the functional set-up choices available for VP participants which influence the monthly invoicing granularity

1.4. Service fee invoicing granularity codes

The service fees identify which invoicing granularity code is applied under the heading "Invoiced to". The applicable invoicing granularity codes are:

Code Invoicing granularity level

AH	=	Participant level
AS	=	sub-level Limited liability company or an investment fund
CM	=	sub-level "Clearing member" (i.e. a given Securities dealer, remote participant or major customer)
DC	=	Data centre
DN	=	Danmarks Nationalbank
FH	=	sub-level for a given direct clearing member
KI	=	Account controller level
UA	=	Issuing agent level
UI	=	sub-level for a Bond issuer

Other definitions used in the price list

Other types of securities = All other types of securities than bonds and SIP (structured investment products), e.g. shares, mutual fund units, warrants, subscription rights, etc.)

Per ISIN = Per unique identifying number given to each security, i.e. per individual security holding.

1.5.T2S Settlement Family Discount

Participants belonging to the same parent company may request the application of a T2S Settlement Family Discount (also referred to Family Pricing in Euronext Securities Milan and Porto). The parent company must control directly for at least the 50% + 1 of the participant. A participant cannot be part of more than one group according to the above criteria.

The T2S Settlement Family Discount is granted on fees applied for the settlement of instructions in T2S: the settlement volumes in T2S invoiced to clients of Euronext Securities (Milan, Porto, Copenhagen) can be considered at group level for the rebate application; in case of change in the group composition during the year, the volumes of the concerned participant entered or left the group considered only for the months during which it was part of the group and the discount is applied to the participant on the invoiced settlement fees for those months on the conditions hereinafter reported.

The parent company shall ask VP for the application of the T2S Settlement Family Discount for itself and the controlled participants by means of a certification to be drafted according to the schema provided by VP. This certification shall be updated any time a change occurs in the group composition (i.e. new intermediary that is part of the group or intermediary that is no more part of the group).

The application of the T2S Settlement Family Discount to intermediary that is part of a group as well as the following changes to the group composition shall be notified by the 15th day of each month and are effective:

- from the first day of the month of the communication in case of initial request of application of the T2S Settlement Family Discount to group whose composition date is effective before the 16th day of the month of communication;
- from the first day of the month following the communication in case of initial request of application of the T2S Settlement Family Discount to group whose composition date is effective after the 15th day of the month of communication;
- from the first day of the communication of the change if the change is effective before the 16th day of the month of communication;
- from the first day of the month following the communication of the change if the change is effective after the 15th day of the month of communication.

1.6. Rebate

The rebate on fees for the settlement of instructions in T2S is applied for annual volumes of T2S settlement instructions totally invoiced by Euronext Securities Milan, Porto and Copenhagen as indicated in the table below. Volumes related to resubmission of instructions and settlement of auto-collateral instruction are excluded from the counting of invoiced settlement instruction volumes considered for the rebate recognition.

Rebate (%)	Annual volume of T2S settlement instructions totally invoiced by Euronext Securities (Milan, Porto and Copenhagen) to the client
2.5%	from 5 million to 12 million
7,5%	Above 12 million

The rebate is applied in the invoicing of January on fees invoiced by VP to the concerned clients for the previous year.

2. CONNECTION TO VP

The connection fees cover VP's costs for a participant's connection and the financial sector's investment in building the infrastructure.

A one-off price is paid when a legal entity connects to VP as a participant. The opening of additional account controller or clearing member levels for the same legal entity already participating in VP SECURTIES will not be invoiced.

To set up a T2S directly connected participant (DCP) arrangement with VP there is an initial setup fee and additionally the DCP entity will also need to successfully complete mandatory tests with VP. The extent of testing is defined on a case by case basis and VP will provide a quote in advance that will be invoiced as fee item "Consultancy service" (65845).

If adjustments are implemented in agreement with CSD Services, they will be invoiced.

3. ISSUANCE

In the issuance service fees distinctions are made between different asset classes e.g. bonds, SIPs (structured investment products), investment funds and equities.

The issue service fees are structured as follows:

- Opening of new ISIN (securities) in VP's registers
- Issue of new units or increase in the circulating volume
- Recurring fees of issued ISINs
- Corporate Actions (CA)

3.1. Opening of new ISIN (securities) in VP's register

VP invoices the registration in VP's securities master file upon the opening of a new ISIN to be issued via VP. The opening of an ISIN that is not to be issued via VP will be not invoiced.

⁵ The fee is excluding Government bonds, Mortgage bonds (RO), Covered property bonds (SDRO) and Covered Bonds (SDO)

⁶ The fee includes Government bonds, Mortgage bonds (RO), Covered property bonds (SDRO) and Covered Bonds (SDO)

3.3. Corporate Actions (CA)

For corporate actions (CA), apart from the interest and partial redemption processing of bonds and dividend distribution for companies and investment funds, a basic fee per CA is invoiced. In addition, there are fees based on the number of holdings in the relevant ISINs involved in the task, as well as fees for the related changes in the bond and shareholder register generated by the CA - i.e. on average 4 records per holding per securities account, depending on the Corporate Action type. A fee for the issue of new securities (see the "[Issue](#)" section), and any payments to investors are also invoiced. In case of the final dissolution of the company changes in holdings and the bond- and shareholder register are still invoiced.

Fees are due for the creation of payments to investors as a consequence of a CA (interest, redemptions, dividend, distributions, redemption of fractions, cash remuneration, etc.). CAs may also generate changes to the bond- and shareholder register for the changed holdings. Please see the "Shareholders register" section for further details

Furthermore, fees are invoiced for the data records (data sent to a KI and UA) generated by a CA. If the recipient requests VP to edit and print these lists, an additional handling fee is invoiced, see the "[Orders](#)" section.

3.4.Shareholder register

Shareholder register transactions are generated in the following situations:

When an investor requests a holding to be registered in the company's shareholder register. If a registered holding is sold and the buyer marks the transaction to be registered, three records are released - a de-registration, a registration and details of the holding.

When initiated by a transaction.

When a CA generates transactions for the shareholder register because of changed holdings. Please see the "Corporate Actions (CA)" section for the services that are generated, and for further details.

5. SETTLEMENT

Settlement transactions sent by participants are counted and invoiced by VP on receipt. Transactions that do not settle on the intended settlement day, for example due to insufficient cover, are automatically recycled in the following settlement day. With the start of each new intended settlement day all eligible transactions will be (re-)attempted and charged accordingly. Each party in the transaction pays for its own side of the transaction updating their securities account holding.

A settlement transaction on the local settlement platform triggers an internal settlement service item while a settlement transaction on T2S triggers an external settlement service item. A discount for internal and external settlement, respectively is achieved for the total number of transactions the participant is party to on either the local settlement platform or on T2S. The total number of transactions is compiled and invoiced on a monthly basis for internal and external settlement, respectively.

Settlement transactions in SIP are subject to a flat fee.

For T2S DCPs transactions a settlement fee is invoiced when VP updates the securities account holding, based upon the copy messages received from T2S.

5.2. T2S-settlement activities

- Direct T2S costs invoiced by the Eurosystem are marked with an asterisk (*) and will be passed on to participants directly. These prices are subject to change in alignment with ECB announced changes in their price structure.
- The T2S costs not marked with an asterisk (*) are subject to a yearly review to ensure the pass-through of indirectly T2S costs is met. VP charges a T2S communication fee per instruction to cover the costs for T2S and SWIFT communication. VP charges a T2S Transfer to cover the costs for a Free of Payment instruction including a T2S communication fee.

Prices charged by T2S can be viewed on ECBs homepage ([T2S Price List](#)). For administrative reasons VP will invoice participants in DKK based on an exchange rate of 7.45 DKK per EUR reflecting the fixed-rate currency policy between DKK and EUR

6. INVESTOR NOTIFICATIONS

When VP delivers investor notification output data, it can provide a data editing service to VP participants. Additionally, the information generated can also be printed and sent directly to the final recipients, or can be uploaded to their personal e-Boks. Participants can choose incremental services for their investor notification data:

Edited record takes the source data string, and delivers the contents in a reader-friendly layout, so that the investor information can be delivered onwards to the recipient more easily.

Print - is an edited record that is printed by VP and sent to the recipient registered in VP's register.

Accordingly, if an investor notification is to be printed in VP and delivered the investor, after it is generated it is firstly edited (service 59930), then printed (service 72404), packaged (service 59237) and stamped (service 76331).

Notes:

If an investor notification consists of more pages than allowed in a single envelope, the notification is sent in multiple envelopes. Thus, on an invoice there may be more packaging and postal fee units than edited and printed message units.

7. ORDERS

Services can be ordered online or by contacting CSD Services. A basic fee is invoiced for all services, and fees are charged based on the size, etc. of data extracts that may be ordered - either for the number of data records or the number of securities accounts in a data extract.

The delivery method for output data has to be arranged with CSD Services, and VP additionally invoices editing and printing as an additional service.
