NXG	EU Next GEN	EU

Euronext Clearing also accepts as collateral the BTP Italia (Italian Government Bond linked to Italian inflation) and BTP Futura (Italian step-up Government Bond) traded on markets other than MTS.

Euronext Clearing reserves the right to modify the list above for reasons of risk management, with urgent Notice distributed through its website <https://www.euronext.com/en/post-trade/euronext-clearing/risk-management/parameters>.

2) VALUATION PRICE (“market value” determination)

Government securities shall be valued using the prices of trades executed or quotations available on the MTS market at the moment of the valuation. Euronext Clearing reserves the right to use a different price if it is considered more representative of market conditions.

3) HAIRCUT CLASSES (“margin value” calculation)

Deposited financial instruments are divided in “classes” according to:

- the criteria adopted for Margining purposes (duration or instrument peculiarity), for Italian financial instruments;
- the duration/residual time to delivery, for the other financial instruments.

To each “class” corresponds a predefined haircut percentage.

Class definition and their corresponding haircuts are periodically reviewed by Euronext Clearing and made available on its website <https://www.euronext.com/en/post-trade/euronext-clearing/risk-management/parameters>.

“Margin value” of each financial instrument is calculated by curtailing the “market value” – determined as indicated at point 2) – of the haircut percentage associated to the class in which the financial instrument is included.

4) Concentration Limits (determination of the value of the “used Collaterals”)

The value of the “used Collaterals” is determined as sum of the collateral value of deposited securities taking into account two maximum concentration limits calculated as:

- ratio of the sum of the “collateral value” of securities deposited and the calculated Initial Margins, to which a limit of 50% is applied;
- ratio of the sum of the “collateral value” of deposited securities of a single Country and the Initial Margins calculated, to which the following limits are applied:

Eligible Countries	Country limit
Italy	45%
Austria	45%
Belgium	45%
Finland	45%

France	45%
Germany	45%
Ireland	45%
The Netherlands	45%
Spain	45%
Portugal	45%
Europe	45%

Euronext Clearing reserves the right to change the above percentages for the purposes of risk management, with urgent Notice distributed through its website www.euronext.com/en/post-trade/euronext-clearing.

The maximum amount that can be deposited for each issue of BTP Italia, BTP Futura, EU 'Sure' and EU 'Next Gen' bonds is indicated in the website <https://www.euronext.com/en/post-trade/euronext-clearing/risk-management/parameters>. This limit is applied to each Clearing Member considering all its accounts (including segregated accounts).

5) FREQUENCY

Margin value shall be recalculated when the Intraday Margins are computed and at the end of the trading day.

2) VALUATION PRICE (“market value” determination)

Government securities shall be valued using the prices of trades executed or quotations available on Bloomberg Data Provider or available on MTS market at the moment of the valuation². Euronext Clearing reserves the right to use a different price if it is considered more representative of market conditions.

3) HAIRCUT CLASSES (“margin value” calculation)

Deposited financial instruments are divided in “classes” according to:

² In case the Triparty Collateral Agent (TPA) uses different pricing sources to value securities collateral, the CCP revalues the securities based on the aforementioned pricing sources and calls the possible arising valuation shortfalls in form of EUR cash

- the criteria adopted for Margining purposes (duration/residual time to delivery/residual time to maturity or instrument peculiarity)

To each “class” corresponds a predefined haircut percentage.

Class definition and their corresponding haircuts are periodically reviewed by Euronext Clearing and made available on its website <https://www.euronext.com/en/post-trade/euronext-clearing/risk-management/parameters>.

“Margin value” of each financial instrument is calculated by curtailing the “market value” – determined as indicated at point 2) – of the haircut percentage associated to the class in which the financial instrument is included. FX haircuts, for the securities denominated in non-EUR currencies, are further applied in addition to the aforementioned haircuts.

4) **Concentration Limits (determination of the value of the “used Collaterals”)**

The value of the “used Collaterals” is determined as sum of the collateral value of deposited securities taking into account two maximum concentration limits calculated as:

- ratio of the sum of the “collateral value” of securities deposited and the calculated Initial Margins, to which a limit of 50% is applied;
- ratio of the sum of the “collateral value” of deposited securities of a single Country and the Initial Margins calculated, to which the following limits are applied:

Eligible Countries	Country limit
Italy	45%
Austria	45%
Belgium	45%
Finland	45%
Denmark	45%
France	45%
Germany	45%
Ireland	45%
The Netherlands	45%
Norway	45%
Spain	45%
Portugal	45%
Sweden	45%
UK	45%

USA	45%
Europe	45%

The above limits are lowered to 35% in case, for a given collateral account, there is the possibility to post securities using Clearcut and the Triparty Collateral Management Tool simultaneously.

- Within the Triparty Collateral Management Tool, the following limits are applied to the ratio of the sum of the "collateral value" of deposited securities of a single Country and the exposure covered by the deposit of Collateral by way of Triparty Collateral Management Tool:

– Eligible Countries	Country limit
– Italy	65%
– Austria	65%
– Belgium	65%
– Finland	65%
– Denmark	65%
– France	65%
– Germany	65%

– The Netherlands	65%
– Norway	65%
– Spain	65%
– Portugal	65%
– Sweden	65%
– UK	65%
– USA	65%
– Europe	65%

Euronext Clearing reserves the right to change the above percentages for the purposes of risk management, with urgent Notice distributed through its website www.euronext.com/en/post-trade/euronext-clearing.

Euronext Clearing reserves the right to apply maximum percentages on the use of non-EUR denominated securities, for the purposes of risk management, with urgent Notice distributed through its website www.euronext.com/en/post-trade/euronext-clearing.

The maximum amount that can be deposited for each issue of BTP Italia, BTP Futura, EU 'Sure' and EU 'Next Gen' bonds is indicated in the website <https://www.euronext.com/en/post-trade/euronext-clearing/risk-management/parameters>. This limit is applied to each Clearing Member considering all its accounts (including segregated accounts). For additional asset types, Euronext Clearing reserves the right to accept/reject ISINs belonging to the given asset type, depending on their liquidity profile.

CASH SETTLEMENT

1. Equity Section

In case buy-in is not possible, unsuccessful or partially successful, ENXC will process a cash settlement according to the following formula⁵:

Cash Settlement Price (CSP) = $\text{Max} ((\text{LP} \times 120\%); \text{OP}_{\text{buyer}}; \text{OP}_{\text{seller}})$

Where: CSP = cash settlement price; LP = last market price (without add-on) and OP = original price.

Cash settlement* =

•Receiving CM (buyer) = $(\text{CSP} - \text{OP}_{\text{buyer}}) \times \text{Quantity}$

•Delivering CM (seller) = $(\text{OP}_{\text{seller}} - \text{CSP}) \times \text{Quantity}$

*The cash settlement amount is debited to the Delivering Clearing Member and credited to one or several Receiving Members that have been selected.

2. Bond Section and Bond Section ICSD

Cash settlement is equal to 10% of the original countervalue of the position, valued on the basis of the market price on day S+13.

3. Extraordinary procedure for Financial Instruments that are unavailable for settlement

For Financial Instruments unavailable for settlement, Euronext Clearing calculates the amount of the cash settlement as follows and the payment will be processed in a symmetric way (Seller or buyer credited or debited, following the formula):

$(\text{Number of securities/shares} \times \text{Last price available}) - (\text{Original countervalue of the position})$

Such price shall be communicated in advance to Euronext Clearing. As examples, this means: the reimbursement price for bonds; the OPA price for shares subject to squeeze-out.

4. Recovery of the differentials

The amounts due from the Member *in malis*, calculated on the basis of the indications of the previous paragraphs, must be increased to take account:

⁵ The exceptions to this formula are:

- For convertible bonds the formula takes into consideration the accrued interest;
- With regards to warrants expiring at maturity date and knock-out warrants expiring prematurely, the LP is the value of a warrant at the moment of the delisting or knock-out.

- of the differential between the countervalue of the positions *in malis* and *in bonis* that are not settled under the liquidation system. The two positions can have a different countervalue because of resulting from trading operations with different prices in the course of the same trading day or on different days;
- of the differential between the amount of the Cash Settlement of the position *in malis* and the position *in bonis*.
- Of any cost incurred in the management of the cash settlement procedure, including the additional cost related to the application of an exchange rate in case of financial instruments multi-listed in different currencies
-

EURONEXT CLEARING shall allocate such differential to the Member *in malis* pursuant to Article B.7.1.3, paragraph 11 and Article B.7.2.5, paragraph 2 of the Instructions.
