## 1.5 Listing Packages

Issuers may choose among one of the listing packages described in the tables below. The purchase of a package gives the right to:

- list during the fiscal year the maximum number of instruments associated with the package (Packages A), B), C) and D); or,
- have a number of instruments listed on the market, whose daily average during each month does not exceed the maximum number associated with the package (Package E).

Listing packages subscribed to by issuing Companies also cover other Companies belonging to the same Group, or related vehicles.

Issuers must notify Borsa Italiana S.p.A. of their chosen package by 20 January of each calendar year. The payment of the associated fee is due on a monthly basis.

### 1.5.1 Packages which give the right to list a maximum number of instruments<sup>3</sup>

A) Listing Packages for Plain Vanilla Covered Warrants

---

<sup>2</sup> For Investment Certificates, the condition for the application of the abovementioned fees, which are not reduced on a pro rata time basis, is the presence of the security on 1 January of the first year following its admission to trading. For Leverage Certificates Class B, the condition for the application of the abovementioned fees, which are not reduced on a pro rata time basis, is the presence of the security on 1 January of the third year following its admission to trading and not being in "Bid-Only Before Buy Back" mode.

<sup>3</sup> Issuers can upgrade their package during the year by communicating their change to Borsa Italiana S.p.A. by 30 September. The new package will be effective starting from the following 1 October and will require the payment of the difference between the *package fee* of the new package and the *package fee* of the previously selected package. The upgrade will not be retroactive, thus *fees for additional ISINs* already paid by the issuer will not be reimbursed.

------------------------------	-----	----------	------

If an Issuer needs to list more instruments than those associated with the chosen package, the additional ISINs are charged according to the fees indicated in each table above.

Concession in the case that an issuer purchases one A) Listing Packages for Plain Vanilla Covered Warrants, and one B) Listing Packages for Structured/Exotic Covered Warrants and Leverage Certificates – Class A (Open End included):

- at any time during the year, if the issuer has not listed all the instruments associated with a chosen package, it may opt to use the unallocated monetary value of that package to list instruments associated with the second package<sup>6</sup>.
- Example:
  - An issuer purchases Plain Vanilla Covered Warrant Package 2 (1,500 instruments for €300,000) and Leverage Certificates - Class A Package 1 (200 instruments for €100,000).
  - After nine months the issuer has listed all 200 Leverage Certificates but only 800 Covered Warrants, which accounts for  $800 \times €200^7 = €160,000$ . The Issuer may decide to communicate to Borsa Italiana S.p.A. that it wishes to use the remaining €140,000 to list additional Leverage Certificates in the number of 280, calculated as  $€140,000 / €500^8$ .

## 1.5.2 Packages which give the right to have an average number of listed instruments

E) Listing Packages for Plain Vanilla Covered Warrants, Structured/Exotic Covered Warrants and Leverage Certificates – Class A (Open End included)

	Number of Instruments		Annual fee
	From	to	
<b>Package 1</b>	1	2,000	€400,000

<sup>5</sup> Package 3 is reserved for Investment Certificates in direct listing without life-cycle events. Life-cycle events are events that may determine an impact on the economic value of the instrument, may occur before the final valuation date and must be notified by the issuer to Borsa Italiana. For instance, coupon payments, autocallable or early termination events, barrier events that transform the payoff at maturity.

<sup>6</sup> The unallocated monetary value of a chosen package and the additional number of listed instruments are rounded to the nearest integer.

<sup>7</sup> €200 is calculated as the Covered Warrant package fee divided by the associated number of instruments.

<sup>8</sup> €500 is calculated as the Leverage Certificates package fee divided by the associated number of instruments.

<b>Package 2</b>	2,001	4,000	€600,000
<b>Package 3</b>	4,001	6,000	€700,000
<b>Package 4</b>	6,001	7,000	€800,000
<b>Package 5</b>	7,001	8,000	€900,000

From Package 5 onwards the cost of subsequent packages is €100,000 for every 1,000 additional listed products.

Furthermore, for those acquiring Package 3 or any larger package, there is an option to include Leverage Certificates – Class B (Open End included) in the package and to obtain an upgrade to the immediately higher package at an annual cost of €400,000.

The number of instruments is calculated on a monthly basis as a daily average of the number of listed active instruments, excluding any Knock-in by Issuer (KIBI) product before the activation. Each month, the applied charge is:

- One twelfth (1/12) of the annual fee of the selected package, if for that month the daily average number is not larger than the number of instruments associated with the selected package;
- One twelfth (1/12) of the annual fee of the relevant package into which the daily average number of listed instruments falls, if for that month the daily average is larger than the number of instruments associated with the selected package.

If the daily average number of listed instruments exceeds the maximum number of instruments associated with the selected package for three consecutive months, the selected package will be automatically updated to the smallest package reached during the abovementioned three months.

For new issuers<sup>9</sup> interested in subscribing to one of the packages described in E), there is an option to adopt a Welcome Package. The Welcome Package has a duration of 24 months and allows new issuers to receive an annual discount of €400,000, which corresponds to the entire value of first package in 1.4.2 (E). If a new issuer opts for or falls during the year into a larger package than the original one, the annual fee will be equal to the difference between the package cost and the €400,000 discount.

The following instruments are included in the calculation of the daily average number of listed products for issuers within the Welcome Package:

- Plain Vanilla Warrants
- Structured/Exotic Warrants
- Variable Leverage Certificates – Class A and B (including Open End).

<sup>9</sup> New issuers refer to entities that do not belong to the same Group, or related vehicles, of issuing companies which purchased one of the packages under letter E) in the previous year.

Primary Liquidity Providers that support the liquidity of instruments admitted to trading under the Welcome Package will be subject to a trading fee as outlined in the tables in paragraph 4.4.1 of the Euronext Cash Markets - Market Makers and Liquidity Providers trading Fee Guide (Fees & Charges | [euronext.com](https://www.euronext.com)).

At any time before the expiration of the Welcome Package, provided that a minimum of one month's notice is given in advance, the issuer has the option to opt out of the Welcome Package. Starting from the first month after opting out, the issuer will start paying listing fees based on the package in which it falls for that month (see (E)) while the Primary Liquidity Provider will no longer be subject to double trading fees.

## 1.6 IPO Direct Distribution

A unitary fee of €450 shall be applied to each instrument subject to the Direct Distribution service, payable by the Assigned Broker upon conclusion of the distribution period.

The fee shall remain applicable even in the event of distribution cancellation and/or if the financial instrument is withdrawn or not admitted to trading on the secondary market.

## 1.7 Particular Cases

### 1.7.1 Instruments admitted but not traded on the market

All amounts mentioned in this Fee Book are exclusive of any tax, duties, charges or levies payable by any Person or Legal Entity.
