# 1. Introduction

## 1.1 Standard fees and charges

This publication sets out the subscriptions, standard fees and charges for products and services available on Euronext's Derivatives Markets. These may be subject to change during the year.

All cleared contracts are booked onto one of the accounts of the assigned member<sup>1</sup>. The assigned member will be charged a trading fee for those contracts, based on the product, the account type and the role of the member.

## 1.2 Clearing fees and charges

Euronext's derivatives markets are cleared by Euronext Clearing. For any questions, please contact Euronext Clearing at [Euronext Clearing | euronext.com](https://euronext.com/clearing).

## 1.3 Wholesale Trade Facility

The wholesale trade facility comprises a diverse set of trade types: Against Actual Facility, Exchange for Swap, Large-in-Scale Trade Facility and Request for Cross Facility.

Not all the facilities are available for all products: the Against Actual Facility and Exchange for Swap are not available for Financial Derivatives. Annex 1 of the Trading Procedures shows which facilities are available for which products.

The Central Order Book fees also apply to trades executed via one of the wholesale facilities unless otherwise specified.

## 1.4 Maximum fee

For some products, a maximum fee per order, per trade or per posting is applied.

The maximum fee per order is applied to trades that are traded on the same date, are booked on the account of the same member, have the same trading symbol (contract code), have the same account type (Client, House or LP), have the same Position Account, have the same Customer Reference.

The maximum fee per trade is applied to trades that are traded on the same date, are booked on the account of the same member, have the same trading symbol (contract code), have the same account type (Client, RO, House or LP)<sup>2</sup>.

The maximum fee per posting is applied per individual posting. The posting of a trade leg is the process by which the Clearing Member registers a trade leg, or a part of a trade leg, either for its own account or for a third/party account, on one of the Position Accounts opened in the Clearing Member's name in the Clearing System.

There are several different maximum fees for Large-in-Scale packages:

---

<sup>1</sup> Assigned member positions are charged considering all give-ups / take-ups at T+0.

<sup>2</sup> Applied to Milan derivatives market.

- At transaction level (potentially multiple instruments in the case of Strategy/Package and multiple counterparts): the maximum fee order is applied to trades that: are traded on the same date, are booked on the account of the same member, have the same trading symbol (contract code), have the same account type (Client, House or LP), have the same Position Account, have the same Wholesale Transaction ID, have the same Customer Reference.
- At trade level: the maximum fee per trade is applied to trades that are executed on the same date, are booked on the account of the same member, have the same trading symbol (contract code), have the same account type (Client, RO, House or LP)<sup>1</sup>.
- At individual posting – i.e. Instrument symbol (for a package: at leg component level): the maximum fee per posting is applied per individual posting. The posting of a trade leg is the process by which the Clearing Member registers a trade leg, or a part of a trade leg, either for its own account or for a third-party account, on one of the Position Accounts opened in the Clearing Member's name in the Clearing System.

## 1.5 Volume Category fee

The volume category fee is applied to the Milan derivatives market only and is charged on a monthly basis, according to the total number of assigned lots on Milan equity derivatives products and in any account.

## 1.6 Retail account type

In order to benefit from trading fees dedicated to trades generated from retail flows (thereafter "Broker Retail (RO account)"), the Member must enter eligible orders via the Retail (RO) account type (account type 4).

Orders submitted via the RO account type must originate from a "non-professional" client, i.e. from a client who has not been classified as a "professional client" within the meaning of the MIFID definition as detailed in Directive 2014/65/EU, Annex II, Section I<sup>2</sup> 1. To be classified as retail agency flow:

- the Member must enter the order with account type 4 (RO)
- the Member or the other "Professional Clients" passing the order to the Member must not interact in any way with the order, except to fulfil best execution obligations.

If the Member does not itself have direct contact with the client, allowing it to classify such client as "non-professional", it shall conduct sufficient due diligence on the flow origin. Factors to be considered in such assessment shall include:

- whether the client is a natural person or not; or
- whether the nature of the client's order flow is such that it can be concluded that such orders do not originate from a trading algorithm or any equivalent computerized process.

The Retail Account Type (account type 4) is activated for the Milan derivatives market only.

Members interested in the activation of the RO account type should contact the Membership Team by email at: [bit-membership@euronext.com](mailto:bit-membership@euronext.com).

---

<sup>1</sup> Applied to Milan derivatives market.

<sup>2</sup> In order to apply this Price List, Annex II Section II of the Directive 2014/65/EU is not included in the definition of "Professional Client".

## 2. Commodities

### 2.1 Agricultural

#### 2.1.1 Futures Contracts

This section sets out the fees for Euronext's agricultural and seafood commodity futures contracts:

- Milling Wheat
- Rapeseed
- Corn
- Durum Wheat
- Salmon
- Spread

All fees are expressed in € (Euros) per lot per side.

■ **Milling Wheat and Rapeseed futures contracts (COB, Large in Scale, Exchange for Swaps, Against Actuals):**

TRADING FEE (PER LOT)
€0.31

■ **Corn and Durum Wheat futures contracts (COB, Large in Scale, Exchange for Swaps, Against Actuals):**

VOLUME PER MONTH PER MEMBER PER CONTRACT (LOTS)	TRADING FEE (PER LOT)
1 – 14,999	€0.31
15,000 – 19,999	€0.13
≥20,000	€0.06

The trading fees for Corn and Durum Wheat will be based on the volume traded for each contract by a Euronext member over the course of the billing month:

- For all trades, up to the first 14,999 lots in a billing month, a Euronext member will be charged the base trading fee of €0.31 per lot.
- For every trade in a billing month where the volume for a Euronext member is between 15,000 (included) and 19,999 (included) lots, the trading fee for those transactions will be €0.13 per lot.

For members where the total lots traded for the particular contract is 20,000 or more in a billing month, the trading fee for each transaction exceeding 19,999 lots will be €0.06 per lot.

■ **Salmon futures contracts:**

TRADING FEE (PER LOT)
€6.00

#### ■ Spread futures:

<b>FUTURES CONTRACT except for participants in the Artemis proprietary trading programme for commodity futures (COB, Large in Scale, Exchange for Swaps, Against Actuals)</b>	<b>TRADING FEE (PER LOT)</b>
European Milling Wheat vs Chicago Wheat	€0.35
European Milling Wheat vs KC HRW Wheat	€0.35
European Milling Wheat vs European Corn	€0.35

<b>FUTURES CONTRACT for participants in the Artemis proprietary trading programme for commodity futures (COB, Large in Scale, Exchange for Swaps, Against Actuals)</b>	<b>TRADING FEE (PER LOT)<sup>1</sup></b>
European Milling Wheat vs Chicago Wheat	€0.27
European Milling Wheat vs KC HRW Wheat	€0.27
European Milling Wheat vs European Corn	€0.27

## 2.1.2 Options Contracts

This section sets out the fees for Euronext's agricultural commodity options contracts:

- Milling Wheat
- Corn
- Rapeseed

All fees are expressed in € (Euros) per lot per side.

#### ■ Outrights:

<b>OPTIONS CONTRACTS</b>	<b>TRADING</b>
Central Order Book	€0.00
Request for cross	€0.31
Wholesale	€0.40

#### ■ Strategies:

All option strategy legs benefit from a dedicated trading fee:

<b>OPTIONS CONTRACTS</b>	<b>TRADING</b>
Central Order Book	€0.00
Request for cross	€0.22
Wholesale	€0.30

The term "leg" is used to define one of the components of the option strategy. As an example, a butterfly strategy is composed of 3 strikes but 4 legs.

<sup>1</sup> This will be applied as a rebate at the end of the month as for the other Artemis programs

## 2.1.3 Incentive Programmes

The Commodity Derivatives Incentive Programmes are available for proprietary trading participants willing to join on either commodity future contracts, or commodity options contracts, but not both. These programmes are structured as follows:

- Artemis programme applicable to commodity futures and options
- Apollo programme applicable to commodity futures only
- Athena programme applicable to commodity futures only
- Hermes programme applicable to commodity futures only

These incentive programmes are not applicable to Salmon futures, Spread Contracts and Container Freight Futures.

Participants that apply to any of these programmes will be required to flag all relevant orders and quotes on the Euronext Order Entry systems with the proper flag as specified by Euronext.

Firms wishing to participate in the programmes will enter into a tripartite arrangement with Euronext and the Member intermediary, under the responsibility of the Member.

The procedure for misflags is described in the "Procedure for Omission" section of this document.

### ■ Artemis Programme on future contracts

Participants in the Artemis proprietary trading programme for commodity futures contracts will receive a monthly rebate on their exchange trading fees for all commodity futures contract trades above a threshold of 50,000 lots per month, according to the following scale:

MONTHLY VOLUME EQUAL OR SUPERIOR TO	MONTHLY VOLUME STRICTLY INFERIOR TO	THRESHOLD TRADING FEE
1	50,000	€0.31 (base trading fee)
50,001	100,000	€0.25
100,001	175,000	€0.23
175,001	250,000	€0.19
250,001	400,000	€0.15
400,001	650,000	€0.12
650,001	-	€0.08

- Participants reaching a threshold will be rebated on the basis of the trading fee for each lot of the given threshold (e.g. €0.31 trading fee for the first 50,000 lots, then €0.25 trading fee for any additional lot under 100,000 lots, and €0.23 trading fee additional lots under 175,000 lots).

## ■ Artemis programme on option contracts

Participants in the Artemis programme for commodity options contracts will receive a monthly rebate on their exchange trading fees for all commodity option contract trades above a threshold of 3,000 lots per month. There is also additional support in addressing the delta hedge of commodity options users.

As an additional incentive for liquidity providers on options, the same level of rebate is also granted for futures, capped to the option volumes.

Artemis for options is separate and non-cumulative with any other commodity pricing programme, according to the following scale:

MONTHLY VOLUME EQUAL OR SUPERIOR TO	MONTHLY VOLUME STRICTLY INFERIOR TO	THRESHOLD TRADING FEE
1	3,000	€0.31
3,001	6,000	€0.23
6,001	10,000	€0.20
10,001	15,000	€0.18
15,001	20,000	€0.15
20,001	25,000	€0.13
25,001	-	€0.10

## ■ Apollo programme

This programme is dedicated to members that have maintained an average long+short open interest of 3,000 lots over the past 6 months and those that have a ratio of cancellations/(total number of orders) lower than 0.5 over the past 6 months.

Additionally, the participant will receive + a €0.03 / lot rebate (table below) on all volumes if reaches 800k lots

MONTHLY VOLUME EQUAL OR SUPERIOR TO	MONTHLY VOLUME STRICTLY INFERIOR TO	THRESHOLD TRADING FEE
1	50,000	€0.31 (base trading fee)
50,001	100,000	€0.25
100,001	175,000	€0.20
175,001	250,000	€0.15
250,001	400,000	€0.10
400,001	650,000	€0.06
650,001	-	€0.04

### ■ Athena programme

This programme is dedicated to members that have maintained an average volume below 30,000 lots across Milling Wheat Futures contract, Corn Futures Contract and Rapeseed Futures contract over the past 6 months. This programme has a one-year duration (renewable)

- Members participating in this programme will have to pay a monthly fixed fee of 15,000 euro.

MONTHLY VOLUME EQUAL OR SUPERIOR TO	MONTHLY VOLUME STRICTLY INFERIOR TO	THRESHOLD TRADING FEE
1	20,000	€0
20,001	-	€0.31

### ■ Hermes programme

This programme is dedicated to members that have an average monthly volume below 500 lots across Milling Wheat Futures contract, Corn Futures Contract and Rapeseed Futures contract over the past 6 months.

This programme has a six months duration (not renewable)

MONTHLY VOLUME EQUAL OR SUPERIOR TO	MONTHLY VOLUME STRICTLY INFERIOR TO	THRESHOLD TRADING FEE
1	10,000	€0
10,001	-	€0.31

## 2.1.4 Options Liquidity Provision Programme

The liquidity provision programme is open to all market participants meeting the eligibility criteria.

The liquidity provision programme is open to all market participants meeting the eligibility criteria. Each liquidity provider meeting the criteria of the liquidity provision programme for commodity options executed in the Central Order Book during a month will benefit from 100% rebate on the trading fees and the top performer with the highest volume during the month will be granted a stipend of €5,000. These rebates are separated and non-cumulative with any other commodity pricing programme including the trading fees waiver for commodity options executed in the Central Order Book (cf part 2.3) and Artemis programme (cf. part 2.4).

See chapter 4 for more information.

## 2.2 Power

### 2.2.1 Futures Contracts

This section sets out the fees for Euronext Nord Pool Power Futures market.

#### ■ Trading fee (COB):

TRADING FEE (PER MWh)
€0.0075

Fees are expressed in € (Euros) per MWh per side.

EPAD INITIATOR SCHEME
Trading fee will be waived for initiators of an EPAD transaction in the COB <sup>1</sup> .

#### ■ Trading membership fee:

TRADING MEMBERSHIP FEE (PER YEAR)
€13,500

Fee is charged on a yearly basis, during the first quarter of a calendar year.

New memberships will be charged upfront for the remaining months of the year, and will be invoiced when the Trading Member goes live<sup>2</sup>. No refund is given in case of termination during a year.

#### ■ Regulatory reporting fee:

REMIT REGULATORY REPORTING FEE	FEE (PER MONTH)
REMIT reporting to ACER	€275
Data provision to Equias (for Swiss/ElCom reporting purposes)	€100

Fees are charged on a monthly basis.

Euronext will also recharge Trading Members in full on a yearly basis for all fees levied by ACER and which are specifically attributable to the REMIT notifications of a trading participant activity<sup>3</sup>.

<sup>1</sup> The scheme aims at increasing price transparency and hedging opportunities for the EPAD market.

<sup>2</sup> Trading membership fee for 2026 will be computed from 1 April 2026 (i.e. Trading Members going live on or before 1 April 2026 will be charged a bespoke pro-rated fee of €10,125).

<sup>3</sup> Refer to Commission Decision (EU) 2025/1771 on fees due to the European Union Agency for the Cooperation of Energy Regulators for collecting, handling, processing and analysing of information reported under Regulation (EU) No 1227/2011 of the European Parliament and of the Council ("Commission Decision").

## 2.2.2 Liquidity Provision Programme

This section outlines liquidity provision programmes for Euronext Nord Pool Power Futures market, which are effective from March 2026.

The programmes require liquidity providers to quote bid-ask spreads and corresponding quantities in the Central Order Book for the Nordic System Price and/or Electricity Price Area Differential (EPAD) contracts. The programmes comprise a set of performance criteria, such as maximum spread, minimum quantities, number of maturities and quoting time window(s). The programmes are open to all market participants meeting the eligibility criteria.

Several programmes are available:

- Liquidity Provider Programme 1: quote two-sided prices and quantities in both the Nordic System Price and all 12 Nordic EPADs.
- Liquidity Provider Programme(s) 2+: quote two-sided prices and quantities in the Nordic System Price and/or selected EPADs.

The programmes are open to all market participants meeting the eligibility criteria, who will enter into a Liquidity Provider Agreement with Euronext. The programmes are set for an initial period of 12 months and are subject to corresponding trading fee rebate (up to 133.33%) and/or monthly stipend (up to €10,000), based on LP programme and performance. These stipends and rebates are separated and non-cumulative with any other schemes.

Please contact [PowerDesk@nordpoolgroup.com](mailto:PowerDesk@nordpoolgroup.com) or your [Market Manager at Nord Pool](#) if you are interested about the programmes.

See chapter 5 for more information.

<sup>2</sup> The trading fee per contract depends on the size of the trade; the fee for each band will be applied where appropriate. For example, for a trade with a trade size of 800 lots, the following trading fee is charged: €0.07 up to 500 lots and €0.02 for the last 300 lots. In the case of a strategy trade, the trading fee is calculated for each individual leg of the strategy separately.

<sup>3</sup> See section 1.4 for the maximum fee calculation

### 3.2.1 Client fee rebate scheme on AEX-Index® options

- For trades in **AEX-Index options** (Monthly, Weekly and Daily<sup>1</sup> options and End of Month) that are booked on the client account, Euronext will bill the Broker standard fee per lot for the first 100,000 lots.
- Then, for the next 100,000 lots (between 100,001 lots and 200,000 lots), a discount scheme will be applied with a negative fee of –€0.25 per lot, considering a minimum fee per order of –€200.
- Finally, for all trades above the 200,000 threshold per member position account per month, Euronext will rebate 100% of the exchange trading fees.
  - Trades booked through the Large-in-Scale Facility will not be eligible for the fee rebate.
  - The fee rebate schemes are open to all trading members trading via the Client account.

### 3.2.2 Client fee rebate scheme on Individual Equity Options, Individual Equity Mini Options,

- For trades in **Individual Equity Options** (IEOs) and **Individual Equity Mini Options** (IEMOs) listed on the Amsterdam derivatives market that are booked on the client account, Euronext will bill €0.31 per lot for the first 200,000 lots, considering a maximum fee per order of €250.
- Then, for the next 200,000 lots (between 200,001 lots and 400,000 lots), a discount scheme will be applied with a negative fee of –€0.25 per lot, considering a minimum fee per order of –€200.
- Finally, for all trades above the 400,000 threshold per member position account per month, Euronext will rebate 100% of the exchange trading fees.
- Trades booked through the Large-in-Scale Facility will not be eligible for the fee rebate.
- The fee rebate schemes are open to all trading members trading via the Client account.

## 3.5 Equity Derivatives - Milan Market

### 3.5.1 Volume category fee

The volume category fee for equity derivatives available on the Milan Derivatives Market is determined based on the number of assigned lots in all accounts and products belonging to the same member (LEI)<sup>1</sup>:

	From 1 to 12,500 lots / month	From 12,501 to 150,000 lots / month	More than 150,000 lots / month
<b>All Milan Market Products</b>	€1,000 / month	€3,000 / month	€4,000 / month

No fee is applied to members with 0 lots assigned during the month.

During the first 12 months of subscription to the Milan Derivatives Market, Members are exempted from the payment of the subscription fee. The waiver does not apply if the new membership is due to a transfer of activity or in the case of firms cancelling their membership and then reapplying in the round of 12 months.

---

<sup>1</sup> If a member (same LEI) clears its trades using more than one Clearing Member, lots cleared through different Clearing Members are aggregated to calculate the volume category fee. The fee will then be split and charged to the different Clearing Members proportionally and according to the number of lots cleared by each Clearing Member. Example: Trading Member A has 10,000 lots assigned, of which: a) Clearing Member 1 clears 7,500 lots and b) Clearing Member 2 clears 2,500 lots. Volume category fee charged to: a) Clearing Member 1 is €750 and b) Clearing Member 2 is €250.

### 3.6.1 Client fee rebate scheme on OBX Index Options and Oslo Individual Equity Options

This scheme refers to **volumes traded on client account in** the Amsterdam market.

In order to benefit from this scheme, members must participate in and meet the volume thresholds of the Amsterdam scheme as explained below:

#### **OBX Index Options**

- For trades in OBX Index Options that are booked on the client account, Euronext will rebate 100% of the exchange trading fees for all trades (excluding trades booked through the Large-in-Scale Facility), as long as the member has reached the 100,000 lots threshold on AEX-Index® options per member position account per month (excluding trades booked through the Large-in-Scale Facility).
- Volume in the OBX Index Options will not count towards meeting the threshold for AEX-Index® options on the Amsterdam market.
- If the Amsterdam threshold is not met, the member will pay the normal client trading fee for OBX Index Options.

#### **Individual Equity Options (IEOs)**

- For trades in IEOs listed on the Oslo derivatives market that are booked on the client account, Euronext will rebate 100% of the exchange trading fees for all trades (excluding trades booked through the Large-in-Scale Facility), as long as the member has reached the 200,000 lots threshold of IEOs and ETF Options listed on the Amsterdam derivatives market per member position account per month (excluding trades booked through the Large-in-Scale Facility).
- Volume in the Oslo listed IEOs will not count towards meeting the threshold for Amsterdam IEOs and ETF Options.
- If the Amsterdam threshold is not met, the member will pay the normal client trading fee for the Oslo market.
- If the Amsterdam Client fee rebate scheme on AEX-Index® options, Individual Equity Options and ETF options is cancelled, this Client fee rebate scheme is automatically cancelled.
- This Client fee rebate scheme is subject to cancellation with one month's notice at the discretion of Euronext.

## 5. Market Maker and Liquidity Provider Trading Fees

### 5.1 Standard fees and charges

This publication sets out the subscriptions, standard fees and charges applicable to Market Maker Agreements (MMA), Market Maker Schemes (MMS) or Liquidity Provider Programmes for products and services available on Euronext Derivatives Markets. These may be subject to change during the year.

### 5.2 Clearing fees

For several products, Market Makers and/or Liquidity Providers may also benefit from dedicated clearing fees. For any questions about clearing fees, please contact Euronext Clearing at [Euronext Clearing | euronext.com](https://www.euronext.com).

### 5.3 Surcharges

When market makers don't comply with market making scheme / liquidity proving obligations, a surcharge is applied. An "intermediary fee" is provided for market makers able to comply with quote, series and spread obligations, but with a lower presence time. In particular, the lower presence time is set as  $\max(\text{presence time}(\%) - 30\%, 50\%)$ .

### 5.4 Performance-Related trading fees

Euronext may apply a dedicated trading fee scheme to Market Makers / Liquidity Providers who show a good monthly performance result<sup>1</sup>. For each applicable product (type), a monthly performance is calculated for each Market Maker / Liquidity Provider and the dedicated trading fee will be based on this monthly performance per applicable product, per Market Maker / Liquidity Provider.

The parameters linked to the performance measurement are available on our website ([Optiq Derivative Market Making Parameter file](#)).

#### Equity and Fixed Income Derivatives

For specific Equity Option products and Fixed Income derivatives, Market Makers who overperform the minimum obligations can benefit from additional rebates. The requirements and the additional rebates are described in the Appendices and in the Market Making Scheme available on the Euronext website ([Market Making Scheme for Derivatives Markets](#)).

In general, unless otherwise specified for the specific product, trading fees will initially be charged at the Standard Market Maker fee and the relevant amount will be surcharged or rebated at the end of the month, depending on the Market Maker's or Liquidity Provider's performance against the contractually defined performance requirements.

#### Commodity Derivatives

---

<sup>1</sup> Not applicable to all Market Maker Schemes/Liquidity Provider Programmes.

Commodity options: Each liquidity provider meeting the criteria of the liquidity provision programme for commodity options executed in the Central Order Book during a month will benefit from a 100% rebate on the trading fees. In addition, the top performer with the highest volume during the month will be granted a stipend of €5,000. These rebates are separate to and non-cumulative with any other commodity pricing programme, including the trading fees waiver for commodity options executed in the Central Order Book (cf section 2.3), and the Artemis programme (cf. section 2.4).

Power futures: The liquidity provision programmes for power futures executed in the Central Order Book are subject to trading fee rebate (up to 100%) and/or monthly stipend (up to €10,000), based on LP programme and performance. These stipends and rebates are separated and non-cumulative with any other schemes.

## 5.5 Market Maker Account

Members participating in any Market Maker Agreement (MMA), Market Maker Scheme (MMS) or Liquidity Provider Programme will be required to flag all relevant orders and quotes on the Euronext Order Entry systems with the proper flag:

- SBE protocol: Field *Account Type* = '6'
- FIX protocol: Field *Account Code* = '6'

## 5.6 Procedure for Omission

Market Makers and Liquidity Providers are fully responsible for entering the correct settings in the system to identify orders as MM/LP orders.

Market Makers and Liquidity Providers are by exception allowed to file for a misflag request, thereby asking Euronext for a reimbursement of relevant trading fees. Such requests are however to be made exclusively on an exceptional basis and they must be duly evidenced. Any such request must follow the procedure below to be considered and processed by Euronext.

1. To notify Euronext of a misflag and any related request, the Market Maker or Liquidity Provider must send a Misflag Request Form with return receipt to its usual Euronext account manager. Templates of the Misflag Request Form to be used are available online via the Euronext Connect customer portal at: <https://connect2.euronext.com/trade/market-makers-liquidity-providers> or through the account manager.
2. The Misflag Request Form must be sent within two months of the relevant invoice date with all relevant information to allow Euronext to process it. Information provided shall, in particular, include details (IT traces) of all orders sent via the Market Maker or Liquidity Provider's trading systems during the relevant period to which the misflag request relates.

Any misflag of orders is a violation of the Euronext Rule Book, and as such is duly analysed through a dedicated committee. Also note that in case of approval of the misflag, Euronext will remove from the overall amount to be reimbursed an amount corresponding to the amount in the violation (at least 10% the first time and more depending on the case).

### 5.15.4 Stressed Market Conditions

The MMS and MME schemes apply both during Normal Trading Conditions and Stressed Market Conditions. During Stressed Market Conditions, relaxed quoting obligations apply (i.e. size halved and spread doubled).

---

<sup>1</sup> Additional rebates apply to COB trades only.

## Appendix 1: Additional rebates for Option products

For specific Option products, as detailed in sections 4.9 – 4.14, Market Makers who overperform the minimum obligations can benefit from rebates applied to the Market Maker and Liquidity Provider fee.

### General Rules

- Performances are based on different parameters; every parameter is calculated independently as a monthly average on a per contract basis and not averaged at product group level.
- The additional rebates are applicable:
  - 1) for the Oslo and Paris derivatives markets, to both Central Orderbook trades and Large-in-Scale trades executed with LP account type; and
  - 2) for the Amsterdam, Brussels and Milan derivatives markets, for Central Orderbook trades only.
- The additional fee rebate applies to trading fee only; the clearing fee charged by Euronext Clearing will remain unchanged.

### Procedure

Additional rebates are provided according to the requirements that the Market Maker respects in terms of additional series, larger quote size, tighter quote spread, and coverage of names included in a package (Paris and Oslo derivatives markets only).

The additional rebate is defined according to a two-dimensional table like the one below

	Additional number of series quoted in % <sup>1</sup>				
	≤1%	>1% - 100%	>100% - 150%	>150% - 250%	>250%
More series	...	...	...	...	...
Larger size	...	...	...	...	...
Tighter spread	...	...	...	...	...
Package Name	...	...	...	...	...
<b>Total - max. rebate</b>	...	...	...	...	...

The column used to calculate the rebate is defined based on the “additional number of series quoted %”. The “additional number of series quoted %” is calculated by comparing the number of quoted series with the minimum number of series the market maker has to cover to respect minimum obligations, as per the below formula.

$$\text{Additional number of series \%} = \frac{(\text{Quoted series} - \text{Minimum number of series})}{\text{Minimum number of series}}$$

Additional series can include both series in the Near The Money (NTM) area and series outside the NTM area.

<sup>1</sup> The additional number of series quoted in % is provided for illustrative purposes only.

Once the correct column has been identified, the rebate to be applied is the sum of each rebate the Market Maker is entitled to receive for respecting the additional requirement available in the rows:

- Additional number of series quotes in % (as per above calculation);
- Quote with a larger size: calculated as the minimum quote size to respect minimum obligations multiplied by the multiplier available in the [Optiq Derivative Market Making Parameter file](#) (larger size multiple field), as per the below formula

$$\text{Size quoted} > (\text{Larger size multiple} * \text{Minimum quote size})$$

- Quote with tighter spread: calculated as the maximum spread to respect minimum obligations multiplied by the multiplier available in the [Optiq Derivative Market Making Parameter file](#) (tighter spread multiple field), as per the below formula

$$\text{Spread quoted} < (\text{Tighter spread multiple} * \text{Maximum quote spread})$$

The larger size and tighter spread are calculated separately by averaging the top 80% of the quotes in the NTM area.

- Package Names (Paris and Oslo markets): at least 85% of the instruments included in the Package for Paris and 75% for Oslo (Package ID field in the [Optiq Derivative Market Making Parameter file](#)) covered by the Market Maker.

## Appendix 2: Additional rebates for Fixed Income derivatives

As per section 5.14.2, Market Makers able to fulfil additional quoting and volume requirements defined for the Market Maker Scheme (MMS) of each applicable product can benefit from rebates applied to the related MMS fees.

### General Rules

- Performances are based on quoting and volume requirements calculated per each applicable product on a monthly basis.
- The additional fee rebates are applicable to COB trades only, executed with LP account type.
- The additional fee rebates apply to both trading and clearing fees - please refer to the Euronext Clearing Fee Schedule for more details on clearing fees.

### Procedure

In order to be eligible for the MMS additional fee rebates, Market Makers are required to fulfil **tighter MMS obligations** in terms of quote size, spread and required maturities<sup>51</sup>, in particular:

- Quote size: 8 contracts
- Spread:
  - 0.01 (absolute) for Mini Futures on BTP 10yr, BUND 10yr and OAT 10yr
  - 0.05 (absolute) for Mini Futures on BONO 10yr and BTP 30yr
- Required maturities (in TTE): 3 months.

Moreover, starting from the first trading day of the front expiry month until the front expiry day, the Market Maker is required to quote both the front expiry and the following expiry (i.e. back expiry), with relaxed obligations during the last trading day of the front expiry (i.e. size halved and spread doubled).

Market Makers that fulfil these tighter MMS obligations in the relevant month are **then ranked by MMS monthly executed volumes** with LP account type, and rewarded according to the following additional rebates:

- **1<sup>st</sup> ranked:**
  - 75% of MMS trading (and clearing) fees from January to December 2026
  - 50% of MMS trading (and clearing) fees from January to December 2027.
- **2<sup>nd</sup> ranked:**
  - 50% of MMS trading (and clearing) fees from January to December 2026
  - 25% of MMS trading (and clearing) fees from January to December 2027.

---

<sup>51</sup> Presence time and quoting period required are as per MMS standard obligations (i.e. 70% during the daily session only).
