Program

09h30 – 10h00 | Get to Know Euronext and the Euronext Trading Game

Start the day by discovering Euronext and understanding our role in financial markets. This session will explore how Euronext connects savings with investments, supports entrepreneurs and innovation, enables access to capital, and creates opportunities for citizens to invest and grow their financial future. Participants will also experience the excitement of financial markets through the Euronext Trading Game.

10h00 – 10h30 | Euronext Securities | Business Operations

An overview of Euronext Securities Porto within the wider Euronext Group, including the role of a Central Securities Depository (CSD), the evolution of Euronext Securities Porto, operational activities, career development opportunities, and the multicultural and collaborative environment across international locations.

10h30 – 11h00 | Euronext Securities | IT

An introduction to Euronext Securities IT, the technology function responsible for designing, building, and operating the platforms supporting Euronext's post-trade business across Europe. The session will provide insights into multinational IT programmes, operational support, and the challenges of delivering critical financial market infrastructure.

11h00 – 11h30 | Corporate Solutions | Our SaaS Portfolio

An overview of Euronext Corporate Solutions (ECS), its role within the Group, and its portfolio of products and services. The session will explore how ECS supports clients through technology and operational capabilities, while highlighting the importance of product lifecycle management from concept to delivery.

11h30 – 12h00 | Information Security | Focus on Cybersecurity

An introduction to cybersecurity in today's digital environment, covering the role of cybersecurity within organisations, key career paths in the field, essential skills for early careers, and the impact of cybersecurity at Euronext.

12h00 – 12h30 | Listing

An introduction to capital markets and the listing journey, explaining how companies raise capital, what it means to be listed on a stock exchange, and why companies choose to go public. The session will also present Euronext's listing solutions and the role of the Primary Markets team in supporting companies throughout their capital markets lifecycle.

12h30 – 14h00 | Lunch Break

14h00 – 14h30 | Monitoring Market Operations & Service Management

An overview of how Euronext monitors and manages its market infrastructure and operations to ensure secure, resilient, and efficient trading environments across the Group.

14h30 – 15h00 | Internal Control

A practical introduction to Internal Control, focusing on how teams manage risk, strengthen processes, and ensure compliance with regulations and standards. The session will also highlight the importance of robust controls within a critical financial market infrastructure environment.

15h00 – 15h30 | Software Development | Building & Maintaining Euronext's Digital Platforms

An introduction to software engineering at Euronext, including high-performance trading systems, low-latency architectures, C++ technologies, agile methodologies, and real-world applications in financial markets.

15h30 – 16h00 | Workplace, Infrastructure & Security

An overview of the core infrastructure managed within Euronext IT, with a focus on system availability, operational resilience, and security. The session will also provide insights into the challenges of supporting large-scale critical financial technology environments.

16h00 – 16h30 | Artificial Intelligence

An introduction to AI activities, including Generative AI solutions and AI agents developed to improve operational efficiency across the organisations.

16h30 – 17h00 | Career Path at Euronext | Mobility Programme

An overview of career development opportunities at Euronext, including talent development initiatives, internal mobility programmes, and the role of Human Resources in supporting employee growth within an international environment.
