Web dashboards
(Tableau)

Update frequency

Daily

Analytics

Descriptive
+ AI predictive model

Settlement Efficiency Dashboards provide interactive, AI-enhanced analytics to monitor and optimize settlement activity executed with **Euronext Securities in Copenhagen, Milan, and Porto.**

The dashboard suite delivers operational KPIs, settlement fail insights, penalty indicators, and predictive intelligence to help institutions proactively manage settlement risk, improve efficiency, and control back-office costs.

Why Settlement Fail Trades?

Proactive fail management

Predict and prevent settlement failures using AI.

Operational transparency

One view of settlement performance across markets.

Cost & penalty control

Understand drivers of settlement penalties and inefficiencies.

Back-office optimization

Improve workflows and service quality.

Smart resource allocation

Align staffing and systems with operational demand.

Management KPIs

Clear metrics for decision-makers.
