

C0. Introduction

C0.1

(C0.1) Give a general description and introduction to your organization.

Euronext has a key position in the financial ecosystem. It serves the real economy by bringing together buyers and sellers in high integrity trading venues that are transparent, efficient and reliable.

In this key role, Euronext has a responsibility vis-à-vis the whole financial community to contribute to the financial stability and the sustainable agenda in the countries in which it operates.

As the only pan-European exchange operating across multiple jurisdictions, Euronext NV reach spans Belgium, France, Ireland, the Netherlands, Portugal and Norway, with a harmonised regulatory framework, a Single Order Book and a single trading platform offering access to all markets through a single connection . This unique model unites marketplaces that date back as far as the start of the 17th century, and is designed to incorporate the individual strengths and assets of each market, combining heritage and forward-looking modernity.

In 2020, Euronext operated six national regulated securities and derivatives markets in Amsterdam, Brussels, Dublin, Lisbon, Oslo and Paris, a regulated derivatives market in Bergen, and – until 30 June 2020 - the UK-based regulated securities market, Euronext London. In April 2021, Euronext completed the acquisition from London Stock Exchange Group of the Borsa Italiana Group.

Euronext operates a number of Multilateral Trading Facilities (MTFs), including its SME- and midcap-dedicated marketplace Euronext Growth (Belgium, France, Portugal, Norway, Ireland), Euronext Access in Belgium, in Portugal and in France, and Euronext Expand in Norway. Euronext also operates several MTFs in Ireland: Global Exchange Market, for listing debt securities aimed at professional investors and investment funds, Atlantic Securities Market, for US listed companies seeking to access euro pools of capital. In Norway, Euronext operates Euronext NOTC, a platform for providing quotes and allowing non-listed firms to benefit from a level of liquidity. Finally, Euronext operates Euronext Block, a pan-European equity block pool in the United Kingdom.

Other business lines include:

- *Power trading*: Through Nord Pool, in which it owns 66%, Euronext operates power markets. Nord Pool operates the leading power market in Europe and operates across 16 European countries including the Nordics, Baltics, the UK and Ireland in addition to France, Germany, Austria, Belgium, the Netherlands, Luxembourg and Poland, while also servicing power markets in Croatia and Bulgaria.
- *Commodity derivatives*: Euronext is a leading provider of agricultural commodity derivatives
- *Market data*: Euronext's market data portfolio provides a wide range of data products to the global investment community, including pre- and post-trade market prices, indices composition, and reference data.
- *Indexes*: Euronext owns and operates a leading benchmark and strategy index franchise.
- *Post-trade services*: Euronext owns three Central Securities Depositories (CSDs), Interbolsa in Portugal, Euronext VPS in Norway and VP Securities in Denmark, supporting our mission to play an active role in global post-trade infrastructure.
- *Technology solutions*: custom and standard solutions for venue operations, regulatory reporting, and ultralow-latency trading for clients worldwide
- *Corporate services*: governance, Investor Relations (IR), ESG Advisory and communication services for listed and private companies
- *Research management*: award-winning software suite for buy-side and sell-side customers
- *Regulatory solutions*: Euronext provides two reporting services: the Euronext trading publication service which has the status of APA (Approved Publication Arrangement) and the Euronext Reporting Service which has the status of ARM (Approved Reporting Mechanism). It provides also insider list management and identification services.

Registered in the Netherlands, Euronext NV is a public company listed on the regulated markets of Euronext Amsterdam, Euronext Paris and Euronext Brussels, with a diverse workforce of 1,455 employees representing 47 nationalities.

C0.2

(C0.2) State the start and end date of the year for which you are reporting data.

	Start date	End date	Indicate if you are providing emissions data for past reporting years	Select the number of past reporting years you will be providing emissions data for
Reporting year	January 1 2020	December 31 2020	Yes	2 years

C0.3

(C0.3) Select the countries/areas for which you will be supplying data.

Belgium
France
Ireland
Netherlands
Norway
Portugal
United Kingdom of Great Britain and Northern Ireland

C0.4

(C0.4) Select the currency used for all financial information disclosed throughout your response.

EUR

C0.5

(C0.5) Select the option that describes the reporting boundary for which climate-related impacts on your business are being reported. Note that this option should align with your chosen approach for consolidating your GHG inventory.

Operational control

C1. Governance

C1.1

(C1.1) Is there board-level oversight of climate-related issues within your organization?

Yes

C1.1a

(C1.1a) Identify the position(s) (do not include any names) of the individual(s) on the board with responsibility for climate-related issues.

Position of individual(s)	Please explain
Other, please specify (Chairman of the Supervisory Board)	Euronext has a two-tier governance structure with a Supervisory Board and a Managing Board. The Supervisory Board is responsible for the supervision of the activities of the Managing Board and the supervision of the general course of the business of Euronext, including the approval and monitoring of its strategy. Euronext's strategic plan to 2022 "Let's Grow Together 2022", approved by the Supervisory Board, operationalises Euronext's mission to "connect local economies to global capital markets, to accelerate innovation and sustainable growth" and has as one of its objectives to enable sustainable finance (See "Innovation and Sustainable Finance at the Heart of the Strategy", Annual Report 2020, p. 18). This strategy is owned by the Managing Board and discussed with the Supervisory Board on a quarterly basis. More broadly, in 2020 the Supervisory Board "monitored the activities of the Managing Board with regard to creating a culture aimed at long-term value creation for the Company and its affiliated enterprise" (Annual Report 2020, p. 126).
Chief Executive Officer (CEO)	The Managing Board is responsible for the day-to-day management of the operations of Euronext and is supervised by the Supervisory Board. The Chief Executive Officer (CEO) sits on the Managing Board and is accountable for the delivery of the strategic plan "Let's Grow Together 2022" and the Group ESG strategy.
Other, please specify (CEO of Euronext Lisbon and Interbolsa)	The CEO of Euronext Lisbon and Interbolsa sits on the Managing Board and leads Euronext's impact area "Our Markets" within the context of the strategic plan "Let's Grow Together 2022" and the Group ESG strategy. Her focus is on climate-related opportunities as part of Euronext's sustainable finance offering
Chief Operating Officer (COO)	The COO sits on the Managing Board and has responsibility for Euronext global GHG footprint both through its offices and its data centres.
Other, please specify (CEO of Euronext Dublin and previous CEO of Euronext Paris)	Members of the Managing Board, they signed off Euronext's ESG Guidelines for Issuers launched in January 2020, covering transparency on climate-related issues.
Other, please specify (General Counsel)	The General Counsel, part of the Group's extended Managing Board, is in charge of coordinating ESG (Environmental, Social and Governance) at the Group level, making sure that all relevant departments integrate the ESG objectives into their missions.

C1.1b

(C1.1b) Provide further details on the board's oversight of climate-related issues.

Frequency with which climate-related issues are a scheduled agenda item	Governance mechanisms into which climate-related issues are integrated	Scope of board-level oversight	Please explain
Scheduled – some meetings	Monitoring and overseeing progress against goals and targets for addressing climate-related issues	<Not Applicable>	

C1.2

(C1.2) Provide the highest management-level position(s) or committee(s) with responsibility for climate-related issues.

Name of the position(s) and/or committee(s)	Reporting line	Responsibility	Coverage of responsibility	Frequency of reporting to the board on climate-related issues
Chief Executive Officer (CEO) <i>Climate change and the impact on society and on our company is part of our new ESG strategy launched in Q4 2019, and is an important part of the company strategy. This strategy is owned by the Managing Board and discussed with the Supervisory Board on a quarterly basis.</i>	<Not Applicable>	Managing climate-related risks and opportunities	<Not Applicable>	Quarterly
Other, please specify (General Counsel) <i>ESG and climate change are part of the portfolio of the General Counsel which is part of the extended Managing Board</i>	<Not Applicable>	Both assessing and managing climate-related risks and opportunities	<Not Applicable>	More frequently than quarterly
Chief Financial Officer (CFO) <i>The CFO is responsible for the annual report as well as risks. ESG is part of the annual report (non-financial declaration)</i>	<Not Applicable>	Both assessing and managing climate-related risks and opportunities <i>At least annually</i>	<Not Applicable>	As important matters arise
Chief Risks Officer (CRO)	<Not Applicable>	Assessing climate-related risks and opportunities	<Not Applicable>	Quarterly

C1.2a

(C1.2a) Describe where in the organizational structure this/these position(s) and/or committees lie, what their associated responsibilities are, and how climate-related issues are monitored (do not include the names of individuals).

The General Counsel, part of the Group's extended Managing Board, is in charge of coordinating ESG (Environmental, Social and Governance) at the Group level, making sure that all relevant departments integrate the ESG objectives into their missions. The General Counsel ensures that ESG initiatives, impacts and challenges are high on the agenda of the Group's Managing Board and Supervisory Board, and that the Company reports on ESG related topics are prepared in a transparent way. The Managing Board and the

Supervisory Board have fully endorsed ESG as part of the Euronext strategy going forward.

An ESG Task Force has been created to support the General Counsel. The Task Force currently consists of global champions of each of the 5 impact areas identified in the ESG strategy (Our Markets, Our Partners, Our People, Our Society and Our environment), which are in their turn supported by local ESG coordinators. The Task Force meets on regular basis and works in close cooperation with the business to develop new initiatives aligned with the Group Strategic Plan, and with the communication and investor relations teams.

C1.3

(C1.3) Do you provide incentives for the management of climate-related issues, including the attainment of targets?

	Provide incentives for the management of climate-related issues	Comment
Row 1	Yes	The short term incentive targets of the Extended Managing Board are for 10% dependent on achieving ESG related targets, including climate related issues.

C1.3a

(C1.3a) Provide further details on the incentives provided for the management of climate-related issues (do not include the names of individuals).

Entitled to incentive	Type of incentive	Activity incentivized	Comment
Chief Executive Officer (CEO)	Monetary reward	Other (please specify)	The short term incentive targets are for 10% dependent on achieving ESG related targets, including climate related issues.

C2. Risks and opportunities

C2.1

(C2.1) Does your organization have a process for identifying, assessing, and responding to climate-related risks and opportunities?

Yes

C2.1a

(C2.1a) How does your organization define short-, medium- and long-term time horizons?

	From (years)	To (years)	Comment
Short-term	0	1	
Medium-term	1	3	
Long-term	3	5	

C2.1b

(C2.1b) How does your organization define substantive financial or strategic impact on your business?

Substantive financial impact is defined by EBITDA margin. A substantive strategic impact is an event which may have a significant negative impact on achieving strategic objectives

C2.2

(C2.2) Describe your process(es) for identifying, assessing and responding to climate-related risks and opportunities.

Value chain stage(s) covered

Direct operations

Risk management process

Integrated into multi-disciplinary company-wide risk management process

Frequency of assessment

Not defined

Time horizon(s) covered

None of the above/ Not defined

Description of process

In order to execute its ambitions Euronext is committed to preserving a balance between achieving its strategic ambitions and ensuring operational excellence. In order to achieve our ambitions and preserve favourable conditions to enable the Company to fulfil its mandate, Euronext has adopted an Enterprise Risk Management (ERM) framework. Enterprise Risk Management framework is designed and operated to identify and assess potential events that may affect the Company, including ESG and climate risks, and seek to manage and monitor them. Euronext embeds the risk management philosophy into the Company culture, in order to make risk and opportunity management a regular and everyday process for employees. The Supervisory Board and Managing Board regard ERM as a key management process to steer Euronext and enable management to effectively deal with risks and opportunities. The ERM framework at Euronext is set out in Chapter 2 of the Universal Registration, document.

C2.2a

(C2.2a) Which risk types are considered in your organization's climate-related risk assessments?

	Relevance & inclusion	Please explain
Current regulation	Relevant, always included	Euronext's business is subject to extensive regulation at both European and national levels in the jurisdictions in which the Group has operations: Belgium, Denmark, France, Ireland, the Netherlands, Norway, Portugal and the United Kingdom. In addition, the Company has a presence in the United States and Singapore. Regulatory changes may impact the operating environment of Euronext exposing the Group to risks associated with the management of implementing and maintaining new regulatory requirements. The Group needs to obtain regulatory approval to implement significant changes to operations of the regulated markets, failure to obtain the required approvals may prevent the Group from achieving its strategic objectives. As the Group expands, its regulatory network expands with it which may introduce new requirements and add complexity to relationships with its existing regulators as well as limit the ability of the Group and its group entities to provide certain of their current or planned services, or to build an efficient, competitive organisation. Beyond the functioning of Euronext's core business, it faces additional regulatory complexity that extends to emerging areas of regulatory focus topics. The Group expects to face increased regulatory security around IT and cybersecurity, cloud outsourcing and Fintech coming from legislative proposals from European governing bodies. If emerging technology and Fintech competitors are able to obtain regulatory approval for similar products or services faster than established companies such as Euronext, or with lower regulatory burdens than regulated entities, the Group's competitive position could be weakened. Adherence to new and evolving regulatory regimes, including climate related regulations, implies increase compliance and associated costs of the Group, for instance by requiring the businesses of the Group to devote substantial time and cost to the implementation of new rules and related changes in their operations as well as impact the ability to outsource certain activities; place financial and Corporate Governance restrictions on the Group and its group entities.
Emerging regulation	Relevant, always included	Euronext's business is subject to extensive regulation at both European and national levels in the jurisdictions in which the Group has operations: Belgium, Denmark, France, Ireland, the Netherlands, Norway, Portugal and the United Kingdom. In addition, the Company has a presence in the United States and Singapore. Regulatory changes may impact the operating environment of Euronext exposing the Group to risks associated with the management of implementing and maintaining new regulatory requirements. The Group needs to obtain regulatory approval to implement significant changes to operations of the regulated markets, failure to obtain the required approvals may prevent the Group from achieving its strategic objectives. As the Group expands, its regulatory network expands with it which may introduce new requirements and add complexity to relationships with its existing regulators as well as limit the ability of the Group and its group entities to provide certain of their current or planned services, or to build an efficient, competitive organisation. Beyond the functioning of Euronext's core business, it faces additional regulatory complexity that extends to emerging areas of regulatory focus topics. The Group expects to face increased regulatory security around IT and cybersecurity, cloud outsourcing and Fintech coming from legislative proposals from European governing bodies. If emerging technology and Fintech competitors are able to obtain regulatory approval for similar products or services faster than established companies such as Euronext, or with lower regulatory burdens than regulated entities, the Group's competitive position could be weakened. Adherence to new and evolving regulatory regimes, including climate related regulations, implies increase compliance and associated costs of the Group, for instance by requiring the businesses of the Group to devote substantial time and cost to the implementation of new rules and related changes in their operations as well as impact the ability to outsource certain activities; place financial and Corporate Governance restrictions on the Group and its group entities.
Technology	Relevant, always included	Technology is a key component of Euronext's business strategy, and is crucial to the Company's success. Euronext's business depends on the security, performance and stability of complex computer and communications systems which at times are managed by critical third party vendors. The Group's markets have experienced systems failures and delays in the past and could experience future systems failures and delays, impacting our members and clients and related trade executions. Such failures may arise for a wide variety of reasons, such as software malfunctions, insufficient capacity, including network bandwidth, in particular, heavy use of Euronext's platforms and order routing systems during peak trading times or at times of unusual market volatility, as well as hardware and software malfunctions or defects, or complications experienced in connection with the operation of such systems, including system upgrades. Euronext's future success will depend, in part, on continued innovation and investment in its trading systems and related ability to respond to customer demands, understand and react to emerging industry standards and practices on a cost-effective and timely basis, as well as in other technologies including leveraging cloud hosting for support and future services. Euronext depends on the services of InterContinental Exchange for the provision of network and colocation and data centre services. Equinix provides the Company with its back up network and data centre service. Euronext depends on Amazon Web Services (AWS) for selected post-trade cloud services. There is a risk that if the Group's (or those of its third-party service providers') technology and/or information systems suffer from major or repeated failures, this could interrupt or disrupt the Group's operations or services and undermine confidence in the Group, cause reputational damage, lead to customer claims, litigation and regulatory action including investigations and sanctions. Euronext will migrate its primary Data Centre and related Colocation services from Basildon, UK, to the Aruba Global Cloud Data Centre IT3 in Bergamo, Italy, in Q2 2022. The Aruba data centre meets the highest quality standards (Rating 4 certification), provides the maximum level of safety and resilience and is 100% powered by renewable energy, enabling to minimise Euronext's environmental impact : https://www.euronext.com/en/technology/euronext-data-centre
Legal	Relevant, always included	Euronext operates in a highly regulated environment with multiple regulators. As a result, many aspects of Euronext's business involve the potential risk that one or more of the Group's entities may fail to comply with the regulatory or contractual requirements to which it is subject, including environmental ones. Compliance risk may arise under laws and regulations relating to financial markets and services, insurance, tax, employee behavior, misuse of data and intellectual property of others, antimony laundering and market abuse, financial sanctions, foreign asset controls, data privacy and foreign corrupt practices areas. In addition, regulatory reporting and outsourcing topics have increased focus by regulators. This risk also includes potential liabilities from disputes over terms of a securities trade or from claims that a system or operational failure or delay caused monetary losses to a customer, claims that the Group facilitated an unauthorised transaction or that it provided materially false or misleading statements in connection with a transaction as well as employment and competition matters and other commercial disputes
Market	Relevant, always included	The Group is exposed to global and regional economic, political and geopolitical market conditions, macroeconomic changes in global or regional demand or supply shifts and legislative and regulatory changes across a number of jurisdictions, geographies and currencies, all of which can affect the level of global and local financial activity. Several macroeconomic factors, including climate change, threaten global economic growth, generating risks regarding economic activity, and may discourage investment. General economic conditions affect financial and securities markets in a number of ways, from determining availability of capital, to influencing investor confidence. Adverse changes in the economy or the outlook for the financial and securities industry can have a negative impact on the Group's revenues through declines in trading volumes, new listings, clearing and settlement volumes and demand for market data. The industry in which the Group operates is highly competitive, and therefore the Group faces significant competition for the products and services that it offers including climate-related ones. Competition has been intensified by trends including: (1) technological innovation, in particular given the usage by the Group of complex information systems; (2) the globalisation of capital markets, which has resulted in greater mobility of capital, greater international participation in local regions and more competition among different geographical areas; (3) the continued growth and expansion of other market participants resulting in stronger global competitors; and (4) the growing appeal of private equity and the increased competition among exchanges. Such competition may intensify further should certain rules, regulations and circumstances change. The Group competes with other market participants in a variety of ways, including in relation to the: (1) quality and speed of trade execution, functionality, data, index services; (2) ease of use and performance of trading systems; (3) range of products and services offered to customers, including trading participants and listed companies, including through the development of new and enhanced propositions; and (4) adoption of technological advancements. Further, competitors continue to compete aggressively on price across each of the Group's product areas as market conditions evolve and become ever more competitive. This trend is expected to continue in the future
Reputation	Relevant, sometimes included	If the Group is unable to adapt to continued changing market pressures and evolving customer demands or maintain its industry position given the intense competition, or is forced to reduce pricing, revenues and profit margins could decline and reputation could be at risks. The success of the Group's business depends on its ability to attract and maintain order flow, both in absolute terms and relative to other market centres, and the loss of order flow would negatively impact the Group's sources of liquidity and its market position, which could have a material adverse effect on the Group's business, results of operations, financial condition and prospects.
Acute physical	Not relevant, explanation provided	Physical risks related to the climate change may cause disruption to financial markets and normal patterns of business activity across the world and impact the global economy and, as a result, the Group's trading and listing revenues may suffer from loss of volume or a decrease in the number of initial public listings. In addition to the key operational risks, widespread remote working may lead to disruption to the Group's operations if significant portions of its workforce are unable to work effectively, including because of buildings affected, illness, government actions, or other restrictions. Effective Business Continuity Management and Disaster Recovery are vital in protecting and underpinning the reputation, efficiency, resilience and competitiveness of Euronext, as well as the Euronext's stakeholders, including risks that are event-driven.
Chronic physical	Not relevant, explanation provided	Physical risks related to the climate change may cause disruption to financial markets and normal patterns of business activity across the world and impact the global economy and, as a result, the Group's trading and listing revenues may suffer from loss of volume or a decrease in the number of initial public listings. In addition to the key operational risks, widespread remote working may lead to disruption to the Group's operations if significant portions of its workforce are unable to work effectively, including because of buildings affected, illness, government actions, or other restrictions. C2.3

(C2.3) Have you identified any inherent climate-related risks with the potential to have a substantive financial or strategic impact on your business?

No

C2.3b

(C2.3b) Why do you not consider your organization to be exposed to climate-related risks with the potential to have a substantive financial or strategic impact on your business?

	Primary reason	Please explain
Row 1	Risks exist, but none with potential to have a substantive financial or strategic impact on business	End of 2019, we have carried out an initial risk assessment, to determine the risk of climate change on our company. As an electronic services provider, Euronext does not directly engage in materially environmentally sensitive activities. Nevertheless, Euronext is committed to environmental sustainability and has endeavoured over the past 10 years to offer an increasing range of ESG products and services to its clients. Euronext partnered with Carbone 4 in order to clearly identify and assess its potential climate-related risks and opportunities in addition to calculating its carbon footprint. Climate change will have a material impact on the global and regional economy in which Euronext is a key player. While these changes will have economic and social consequences, the preliminary assessment has concluded that Euronext's carbon footprint is relatively low and the exposure to climate change related risks are limited. Euronext closely monitors the potential ESG risks arising from the continuously evolving environment it operates in, with increased focus on satisfying changing investors' needs while supporting the transition of product issuers

C2.4

(C2.4) Have you identified any climate-related opportunities with the potential to have a substantive financial or strategic impact on your business?

Yes

C2.4a

(C2.4a) Provide details of opportunities identified with the potential to have a substantive financial or strategic impact on your business.

Primary potential financial impact

Increased revenues resulting from increased demand for products and services

Company-specific description

As part of its latest strategic plan, Euronext continues exploring opportunities to facilitate the financing of ESG-friendly assets while developing solutions that help organizations reduce their impact. Euronext has developed sustainable products and services with environmental added value. In addition it has put a strong focus on reducing its own footprint. Euronext will continue to grow the range of its ESG products and services that are offered on our exchanges. Euronext started its first ESG product offering over a decade ago with the Low Carbon 100 Europe Index and has continued to increase the number of ESG indices as well as diversify the ESG product offering to socially responsible ETFs, Green Bonds, and specific commodity futures. Euronext has also sought over the course of several years to support climate-friendly innovation by financing Cleantech companies and through its Corporate Services offering, assists companies and organisations in reducing their environmental impact. Euronext is committed to continue creating offers that help organizations have a sustainable approach to their operations.

C3. Business Strategy

C3.1

(C3.1) Have climate-related risks and opportunities influenced your organization's strategy and/or financial planning?

Yes

C3.1b

(C3.1b) Does your organization intend to publish a low-carbon transition plan in the next two years?

	Intention to publish a low-carbon transition plan	Intention to include the transition plan as a scheduled resolution item at Annual General Meetings (AGMs)	Comment
Row 1	Yes, in the next two years	No, we do not intend to include it as a scheduled AGM resolution item	

C3.2

(C3.2) Does your organization use climate-related scenario analysis to inform its strategy?

No, but we anticipate using qualitative and/or quantitative analysis in the next two years

C3.2b

(C3.2b) Why does your organization not use climate-related scenario analysis to inform its strategy?

Convinced that climate change will have material impact on the economy as a whole and conscious of the challenges linked to climate change, Euronext is already inserting climate-related scenario in the building of its index business. Euronext launches the Euronext V.E ESG World 75 Index, an International Climate Transition Benchmark (CTB) index, focused on worldwide equity investments, which will support the German Federal Government's Special Pension and Care Funds in aligning its Sustainable Finance Strategy with the climate transition targets of the European Union (EU). This index is aligned with the target to reducing carbon emissions and its benchmark statement provides the temperature scenario used for the alignment with the target to reducing GHG emissions which is 2° as well as the methodology used by Carbone 4. The methodology is based on induced emissions, emissions savings and forward-looking analysis at company level. Carbon Impact Analytics provides conclusions on the alignment of a portfolio or index with a climate change trajectory. This alignment is a convention based on a scale of average overall ratings of underlying firms. (<https://www.euronext.com/en/about/media/euronext-press-releases/euronexts-esg-world-75-index-chosen-federal-government-germanys>)

C3.3

(C3.3) Describe where and how climate-related risks and opportunities have influenced your strategy.

	Have climate-related risks and opportunities influenced your strategy in this area?	Description of influence
Products and services	Yes	In 2020, we delivered an increasing number of ESG indices, diversified the ESG product and services offering including ETFs, bonds, and specific commodity futures. - Euronext is the #1 ESG bonds listing venue and #1 ESG index provider for structured products in Europe. - Euronext expanded its Green Bonds platform to include green, social, sustainable, sustainability-linked and blue bonds. The new platform allows issuers to showcase their ESG credentials and the investors to locate ESG bond investments. - Euronext's innovative ESG index franchise: Having established its first ESG product offering over a decade ago, the Low_Carbon_100_Europe_Index, Euronext continues to innovate. In 2020, Euronext launched the first Low Carbon Paris-Aligned index, adapting the criteria to comply with the Paris 1,5° degree, the Euronext ESG_Large_80 and a related Futures contract and the first local ESG benchmark from its index family – the CAC40_ESG_index. 88% of Euronext Indices were ESG related. - Euronext is the only Exchange signatory of the UNGC Sustainable Ocean Principles which provides a framework for responsible business practices across sectors and geographies and contributes to the UNGC Blue Bond Reference Paper, to identify opportunities to use the ESG bond market to secure capital for ocean-related projects. - Euronext supports community activities that have an impact aligned with our corporate value and launched the "Blue Challenge" in partnership with JA Europe. - Sustainable Services: Euronext supports issuers in the current ESG evolution, with tailored programmes to increase ESG knowledge, connect with relevant stakeholders and advocate for goals and interests. - ESG Reporting : Euronext has the responsibility and ambition to equip listed companies to meet the rising expectations of the investor community regarding transparency and sustainability. Euronext's ESG Reporting Guidelines, supports listed companies in their interactions with investors and the wider ESG community, helping them understand how to address ESG issues as a key component of investor relations. Euronext has also contributed to FESE's guiding principles to ESG reporting. - Financing a Greener Economy with the Cleantechs program
Supply chain and/or value chain	Yes	In the context of Euronext ESG strategy , Procurement is now systematically (i.e. for 100% of the vendors considered) assessing short listed vendors on: - Environmental criteria - Social criteria - Human right criteria In practice, this means that all vendor questionnaires and RFP's now include an evaluation on the three above criteria's – and it is factored in the global rating of the vendors.
Investment in R&D	Yes	Before becoming creating new climate-related products or services, Euronext spend a lot of time with its ensures clients and stakeholders are heard, to understand what are their needs and wishes.
Operations	Yes	On all our product lines, our core focus is to develop products enabling clients to transition (listing, ETFs, derivatives, indices). This is also true at the infrastructure level, with the selection of a carbon-neutral datacenter to host our core matching engines and data center

C3.4

(C3.4) Describe where and how climate-related risks and opportunities have influenced your financial planning.

	Financial planning elements that have been influenced	Description of influence
Row 1	Revenues	Tracking of ESG related revenues is under way

C3.4a

(C3.4a) Provide any additional information on how climate-related risks and opportunities have influenced your strategy and financial planning (optional).

Euronext has a special position in the financial ecosystem. It serves the real economy by bringing together buyers and sellers in high integrity trading venues that are transparent, efficient and reliable. In this key role Euronext has a responsibility vis-à-vis the

whole finance community to contribute to the financial stability and the sustainable agenda in the countries in which it operates. As a key market infrastructure, at the heart of the financial ecosystem, Euronext supports the acceleration of the transition towards sustainable growth and finance.

In 2019, Euronext has decided to make sustainable finance a key pillar of its strategy "Lets' grow together 2022".

The Euronext ESG ambition is to finance local and global real economy in its transition towards a sustainable society by:

- driving investment in innovative, sustainable products and services through secure and transparent markets, in continuous collaboration with the financial community;
- inspiring and promoting sustainable tangible practices within the Company and towards our communities, by respecting and developing our people and by supporting our ecosystem.

This dual ambition is fully aligned with the Action Plan on Financing Sustainable Growth launched by the European Commission and with the Green deal presented by the European Commission in December 2019.

2020 has been a special year due in particular to the health crisis but also because it has seen the so-called sustainable economy – taking better account of the ESG dimension – come out stronger. Euronext has also confirmed its desire to be a leader in sustainable finance.

C4. Targets and performance

C4.1

(C4.1) Did you have an emissions target that was active in the reporting year?

No target

C4.1c

(C4.1c) Explain why you did not have an emissions target, and forecast how your emissions will change over the next five years.

	Primary reason	Five-year forecast	Please explain
Row 1	We are planning to introduce a target in the next two years		According to the materiality analysis conducted in 2019, environmental issues are not considered to be material for Euronext due to the nature of its business. Nevertheless, conscious of the challenges linked to climate change in general, of the need of every company and citizen to reduce its greenhouse gas emissions and to manage natural resources prudently and sparingly, Euronext has fully integrated environmental issues into its activities and strategy. In this context, Euronext has carried out an analysis of its carbon footprint in 2019 and in 2020 (with a significant carbon intensity reduction of 30% between the two years) and will focus in the coming years on fixing targets and continuing reducing its carbon footprint. Moreover, Euronext has also endorsed the Task Force on Climate related Financial Disclosures Recommendations and committed to further support transparency on climate-related risks and opportunities on financial markets

C4.2

(C4.2) Did you have any other climate-related targets that were active in the reporting year?

No other climate-related targets

C4.3

(C4.3) Did you have emissions reduction initiatives that were active within the reporting year? Note that this can include those in the planning and/or implementation phases.

Yes

C4.3a

(C4.3a) Identify the total number of initiatives at each stage of development, and for those in the implementation stages, the estimated CO2e savings.

	Number of initiatives	Total estimated annual CO2e savings in metric tonnes CO2e (only for rows marked *)
Under investigation	6	
To be implemented*	0	
Implementation commenced*	9	
Implemented*	31	
Not to be implemented	5	

C4.3b

(C4.3b) Provide details on the initiatives implemented in the reporting year in the table below.

Initiative category & Initiative type

Energy efficiency in buildings	Other, please specify (Renegotiate electricity contracts with a green or carbon neutral supplier)
--------------------------------	---

Estimated annual CO2e savings (metric tonnes CO2e)

Scope(s)

Scope 2 (market-based)

Voluntary/Mandatory

Voluntary

Annual monetary savings (unit currency – as specified in C0.4)

Investment required (unit currency – as specified in C0.4)

Payback period

Please select

Estimated lifetime of the initiative

Please select

Comment

This is done for all the owned buildings. For leased offices, contacts with landlords have been carried out in order to raise awareness of the adoption of green or carbon neutral suppliers

Initiative category & Initiative type

Energy efficiency in buildings	Lighting
--------------------------------	----------

Estimated annual CO2e savings (metric tonnes CO2e)

Scope(s)

Scope 2 (market-based)

Voluntary/Mandatory

Voluntary

Annual monetary savings (unit currency – as specified in C0.4)

Investment required (unit currency – as specified in C0.4)

Estimated lifetime of the initiative

Please select

Comment

Instructions has been given for owned buildings. Information is not available for rented building : costs are not directly supported by the company.

Initiative category & Initiative type

Energy efficiency in buildings	Other, please specify (Emergency generator change to a more efficient one with decreased CO2 emissions and Change UPS batteries to increase energy efficiency)
--------------------------------	--

Estimated annual CO2e savings (metric tonnes CO2e)

Scope(s)

Scope 1

Voluntary/Mandatory

Voluntary

Annual monetary savings (unit currency – as specified in C0.4)

55000000

Investment required (unit currency – as specified in C0.4)

69000000

Payback period

1-3 years

Estimated lifetime of the initiative

6-10 years

Comment

For the office in Porto

C4.3c

(C4.3c) What methods do you use to drive investment in emissions reduction activities?

Method	Comment
Dedicated budget for energy efficiency	Although environmental sustainability was already a priority, after presenting the new Strategic Plan " Let's Grow Together 2020-2022" , for Euronext, the commitment to make changes that will protect our planet for generations to come has become even more significant. Ensuring that the Group accomplishes the reduction of its environmental footprint, during 2020, an Action Plan has been initiated and put into practice. With a set of actions transversal to all buildings, and at the same time ensuring that specific measures were adjusted to each location specificities, the efforts focus on four central areas: Building, Travel, Reduction and elimination of plastic, and others. During the year 2020, numerous measures were implemented across all locations, such as no plastic recipients are available in the buildings, including plastic bottles in the meeting rooms, and plastic utensils were removed from all cafeterias (to be fully implemented in Amsterdam and Paris during 2021). In Oslo, Brussels, and Dublin, electricity contracts were renegotiated with a green or carbon neutral supplier. During yearly budget process, each initiatives is integrated in the Facilities CAPEX estimate for each location and follows the standard approval process

C4.5

(C4.5) Do you classify any of your existing goods and/or services as low-carbon products or do they enable a third party to avoid GHG emissions?

Yes

C4.5a

(C4.5a) Provide details of your products and/or services that you classify as low-carbon products or that enable a third party to avoid GHG emissions.

Level of aggregation

Product

Description of product/Group of products

Low Carbon 100 Europe Index measures the performance of Europe's 100 largest blue chips with the lowest CO2 emissions in their respective sectors or sub-sectors. The methodology of the index evolved to be in line with the changing regulation and demand. In 2020, the methodology of the index evolved to be in line with the EU label, the Paris Aligned Benchmark (PAB).

Are these low-carbon product(s) or do they enable avoided emissions?

Low-carbon product

Taxonomy, project or methodology used to classify product(s) as low-carbon or to calculate avoided emissions

Other, please specify (European Benchmark - EU label, the Paris Aligned Benchmark)

% revenue from low carbon product(s) in the reporting year

% of total portfolio value

Level of aggregation

Group of products

Description of product/Group of products

Euronext Climate Europe Indices are free float market cap indices designed to be low carbon Universe. Composed of 200 large companies based on their climate score. It paves the way to many climate friendly innovative variants (high yields, low risk, growth, etc). These indices are well established with several Structured Products linked to the index.

Are these low-carbon product(s) or do they enable avoided emissions?

Low-carbon product

Taxonomy, project or methodology used to classify product(s) as low-carbon or to calculate avoided emissions

Other, please specify (To perform this best in class approach, Euronext calculates a climate score by combining the scores of two cutting-edge experts, Carbone 4 and the Carbon Disclosure Project ("CDP").)

% revenue from low carbon product(s) in the reporting year

% of total portfolio value

Comment

Several indices have been derived over 2017 around this Euronext Climate Euronext Index for investment purpose: The Euronext Climate Orientation Priority index and Euronext Climate Objective 50 EW index and the Euronext Climate Objective 50 Euro EW (2018).

Level of aggregation

Group of products

Description of product/Group of products

Euronext CDP Indices measure the performance of the top performing companies from a broad universe (World, Eurozone or France) in the environmental fields, with regards to their respective CDP rating. CDP gives a score to the companies in the universe based on three different themes, forests, water and climate. The companies that form the index universe are ranked on their environmental score and the highest ranking companies will be selected in the indices

Are these low-carbon product(s) or do they enable avoided emissions?

Low-carbon product and avoided emissions

Taxonomy, project or methodology used to classify product(s) as low-carbon or to calculate avoided emissions

Other, please specify (CDP score)

% revenue from low carbon product(s) in the reporting year

% of total portfolio value

C5. Emissions methodology

C5.1

(C5.1) Provide your base year and base year emissions (Scopes 1 and 2).

Scope 1

Base year start

January 1 2019

Base year end

December 31 2019

Base year emissions (metric tons CO2e)

370

Comment

Scope 1 = 370 tCO2eq representing 2% of the Euronext global carbon footprint i.e. direct emission from buildings and other assets.

Scope 2 (location-based)

Base year start

January 1 2019

Base year end

December 31 2019

Base year emissions (metric tons CO2e)

1760

Comment

Scope 2 = 1,7 60 tCO2eq representing 9% of the Euronext global carbon footprint i.e. electricity consumption

Scope 2 (market-based)

Base year start

Base year end

Base year emissions (metric tons CO2e)

Comment

C5.2

(C5.2) Select the name of the standard, protocol, or methodology you have used to collect activity data and calculate emissions.

The Greenhouse Gas Protocol: A Corporate Accounting and Reporting Standard (Revised Edition)

C6. Emissions data

C6.1

(C6.1) What were your organization's gross global Scope 1 emissions in metric tons CO2e?

Reporting year

Gross global Scope 1 emissions (metric tons CO2e)

270

Start date

January 1 2020

End date

December 31 2020

Comment

Scope 1 = 270 tCO2eq representing 1 % of the Euronext global carbon footprint i.e. direct emission from buildings and other assets

Past year 1

Gross global Scope 1 emissions (metric tons CO2e)

370

Start date

January 1 2019

End date

C7. Emissions breakdowns

C7.1

(C7.1) Does your organization break down its Scope 1 emissions by greenhouse gas type?

No

C7.2

(C7.2) Break down your total gross global Scope 1 emissions by country/region.

Country/Region	Scope 1 emissions (metric tons CO2e)
----------------	--------------------------------------

C7.3

(C7.3) Indicate which gross global Scope 1 emissions breakdowns you are able to provide.

C7.5

(C7.5) Break down your total gross global Scope 2 emissions by country/region.

Country/Region	Scope 2, location-based (metric tons CO2e)	Scope 2, market-based (metric tons CO2e)	Purchased and consumed electricity, heat, steam or cooling (MWh)	Purchased and consumed low-carbon electricity, heat, steam or cooling accounted for in Scope 2 market-based approach (MWh)
----------------	--	--	--	--

C7.6

(C7.6) Indicate which gross global Scope 2 emissions breakdowns you are able to provide.

C7.9

(C7.9) How do your gross global emissions (Scope 1 and 2 combined) for the reporting year compare to those of the previous reporting year?

C8. Energy

C8.1

(C8.1) What percentage of your total operational spend in the reporting year was on energy?

More than 0% but less than or equal to 5%

C8.2

(C8.2) Select which energy-related activities your organization has undertaken.

	Indicate whether your organization undertook this energy-related activity in the reporting year
Consumption of fuel (excluding feedstocks)	Yes
Consumption of purchased or acquired electricity	Yes
Consumption of purchased or acquired heat	No
Consumption of purchased or acquired steam	No
Consumption of purchased or acquired cooling	Yes
Generation of electricity, heat, steam, or cooling	No

C8.2a

(C8.2a) Report your organization's energy consumption totals (excluding feedstocks) in MWh.

	Heating value	MWh from renewable sources	MWh from non-renewable sources	Total (renewable and non-renewable) MWh
Consumption of fuel (excluding feedstock)	Please select			21.28
Consumption of purchased or acquired electricity	<Not Applicable>			6513
Consumption of purchased or acquired heat	<Not Applicable>	<Not Applicable>	<Not Applicable>	<Not Applicable>
Consumption of purchased or acquired steam	<Not Applicable>	<Not Applicable>	<Not Applicable>	<Not Applicable>
Consumption of purchased or acquired cooling	<Not Applicable>			0
Consumption of self-generated non-fuel renewable energy	<Not Applicable>	<Not Applicable>	<Not Applicable>	<Not Applicable>
Total energy consumption	<Not Applicable>			6534.28

C8.2b

(C8.2b) Select the applications of your organization's consumption of fuel.

	Indicate whether your organization undertakes this fuel application
Consumption of fuel for the generation of electricity	Yes
Consumption of fuel for the generation of heat	Yes
Consumption of fuel for the generation of steam	No
Consumption of fuel for the generation of cooling	No
Consumption of fuel for co-generation or tri-generation	No

C8.2c

(C8.2c) State how much fuel in MWh your organization has consumed (excluding feedstocks) by fuel type.

C9. Additional metrics

C9.1

(C9.1) Provide any additional climate-related metrics relevant to your business.

C10. Verification

C10.1

(C10.1) Indicate the verification/assurance status that applies to your reported emissions.

	Verification/assurance status
Scope 1	Third-party verification or assurance process in place
Scope 2 (location-based or market-based)	Third-party verification or assurance process in place
Scope 3	Third-party verification or assurance process in place

C10.1a

(C10.1a) Provide further details of the verification/assurance undertaken for your Scope 1 emissions, and attach the relevant statements.

Verification or assurance cycle in place

Annual process

Status in the current reporting year

Complete

Type of verification or assurance

Limited assurance

C10.2

(C10.2) Do you verify any climate-related information reported in your CDP disclosure other than the emissions figures reported in C6.1, C6.3, and C6.5?

No, we do not verify any other climate-related information reported in our CDP disclosure

C11. Carbon pricing

C11.1

(C11.1) Are any of your operations or activities regulated by a carbon pricing system (i.e. ETS, Cap & Trade or Carbon Tax)?

No, and we do not anticipate being regulated in the next three years

C11.2

(C11.2) Has your organization originated or purchased any project-based carbon credits within the reporting period?

No

C11.3

(C11.3) Does your organization use an internal price on carbon?

No, and we do not currently anticipate doing so in the next two years

C12. Engagement

C12.1

(C12.1) Do you engage with your value chain on climate-related issues?

Yes, our suppliers

C12.1a

(C12.1a) Provide details of your climate-related supplier engagement strategy.

Type of engagement

Other, please specify (For Scope 3, 35% of the purchases are represented based on the top 30 suppliers. In that context, Euronext has initiated a dialogue with its entire value chain (upstream and downstream) to act on the bulk of these emissions)

Details of engagement

Please select

% of suppliers by number

% total procurement spend (direct and indirect)

% of supplier-related Scope 3 emissions as reported in C6.5

Rationale for the coverage of your engagement

Impact of engagement, including measures of success

Comment

C12.3

(C12.3) Do you engage in activities that could either directly or indirectly influence public policy on climate-related issues through any of the following?

Direct engagement with policy makers

C12.3a

(C12.3a) On what issues have you been engaging directly with policy makers?

Focus of legislation	Corporate position	Details of engagement	Proposed legislative solution
Other, please specify (Taxonomy)	Support with minor exceptions	Euronext engages directly or through the FESE with public authorities and policymakers on regulatory and policy issues that impact the financial sector and its stakeholders. As a result of the European Commission's Action Plan on Financing Sustainable Growth and the European Green Deal, a number of legislative proposals have been agreed on which aim to incentivize investments in sustainable activities	

C12.3f

(C12.3f) What processes do you have in place to ensure that all of your direct and indirect activities that influence policy are consistent with your overall climate change strategy?

C12.4

(C12.4) Have you published information about your organization's response to climate change and GHG emissions performance for this reporting year in places other than in your CDP response? If so, please attach the publication(s).

C15. Signoff

C-FI

(C-FI) Use this field to provide any additional information or context that you feel is relevant to your organization's response. Please note that this field is optional and is not scored.

C15.1

(C15.1) Provide details for the person that has signed off (approved) your CDP climate change response.

	Job title	Corresponding job category
Row 1		Other, please specify (Head of Group ESG)

Submit your response

In which language are you submitting your response?
