All Clients

Re:

T2S R3.0 release into production

Dear Client,

Please note that the ECB has confirmed the release into production of T2S 3.0 as of Monday 10 June 2019.

---

### Implementation plan

The software will be launched into production according to “option 2” defined in the MOP.

This procedure requires the suspension of the settlement day at 18:45 approximately on Friday 7 June, following the production of the end-of-day reports, and the closure of all communication channels at 20:00 simultaneously with Monte Titoli.

MonteTitoli services are scheduled to re-open on Saturday 8 June at 17:30 and subject to a confirmatory communication from the PTTTS SOMT team.

The said team will send update emails when the most significant stages of the release process are attained:

- Friday 7/6 at approximately 20:00, confirming the commencement of the release procedure
- Saturday 8/6 at approximately 13:10, confirming the launch of the SOD phase
- Saturday 8/6 at approximately 17:30, confirming the reaching of the Point of No Return

The final release plan is available at the following path of the MT-X platform: Documents > T2S Release Management > T2S Releases – Incidents and Problems > T2S release 3.0 > OMG Strategy for the deployment of R3.0 v2.pptx

Please use the following contact address for support requests during the implementation phase:
