MonteTitoli 4U
New portal for access to the operating management platforms

Addressees:	**Clients**
Priority:	**Average**
Re:	**Restyling and new access to the Monte Titoli operating platforms**

Dear Client,

We wish to inform you that, in order to improving the use of the web services, during the next few months Monte Titoli has planned a series of releases designed to improve use and navigation of its platforms in User to Application mode.

With restyled graphics, the new portal **MonteTitoli 4U** from today will allow you to access the various Custody, Settlement, Collateral Management and Membership services in integrated mode.

Monte Titoli clients who already have the credentials will in this way be able to access the various specific contents for each of the services directly from the website:

- **Custody MT-X**: the interactive dashboard for managing and monitoring the custody service and domestic and international asset servicing in real time.
- **Collateral: X-COM**, for the management of triparty repo collateral
- **Settlement: X-TRM/T2S** for the routing of contracts (on exchange and OTC) and the relevant settlement reporting
- **Membership: CLIMP** for the overall management of an association with Monte Titoli

The link for access to **MonteTitoli 4U**, in alternative to the usual https://mtservices.montetitoli.it/prod, is available on the Monte Titoli web site
