Client Migration Platform go-live

Dear Client,

Monte Titoli are pleased to announce the activation of the **Client Migration Platform (CLIMP)**.

CLIMP is a web-tool through which Participants can manage membership information and configuration details for T2S go-live.

CLIMP will be used also after the launch of T2S, in replacement of current operational and contractual paper-copy documents, and of Bit-Club tool.

CLIMP can be accessed through the following URL: <https://mtservicesdr.montetitoli.it/t3> by means of credentials already in the hands of Clients and currently used to access MT-X platform.

Those who don't have the credentials can request them by sending an email to Monte Titoli at the following address: client@lseg.com.

What to do:

1. Take note of the data available in the tool and check the consistency and coherence of them compared to the current situation
2. Identify the operational framework (DCA, Party BIC and securities accounts) to be used in the new T2S platform
3. Make, if necessary, potential changes directly in CLIMP

For additional details, please refer to the [Migration Preparation Schedule](#) document.
