CLIMP new release

Dear Client,

is now available a new release of Monte Titoli tool Client Migration Platform (CLIMP) which solves the following problems:

- Explorer 8 compatibility problem
- Wrong limit on the maximum length of the DCA

SAC-DCA link once created is not modifiable, as a consequence, in order to reduce client's activities, Monte Titoli has closed automatically all the invalid links present in CLIMP. For invalid links we refers to those "T2S DVP Payments" and to "T2S Corporate Actions Payments" with a wrong value in the fields "DCA" and "CMB". In this way the correct input of the real cash coordinates is now possible.
