NYSE Technologies would like to inform clients that effective 24 November 2010 two new strategy indices will be calculated and disseminated on NYSE Euronext channel 107 of the Universal Trading Platform Market Data Feed: CAC 40 X4 SHORT GR and CAC 40 X5 SHORT GR.

These two indices track the performance of a strategy that combines a leveraged inverse exposure to an underlying index with exposure to a risk-free money market instrument. Thus, these two indices reflect a strategy that yields, on a daily basis, the X4 and X5 (respectively) inverse performance of the underlying gross return of the CAC 40® index.

The new indices will be calculated and disseminated from 24 November 2010. The calculation will be continuous, every 15 seconds, throughout the trading day. Both new indices will have a base value of 10.000 as at 31 December 2008.

Please also note that the base value of the already existing CAC 40 X3 SHORT Index will be aligned with that of the two new indices.

The full historical data will be sent on the evening prior to the Effective Date.

Additional information:

TradingCode	Mnemo	Name	StockExchangeCode	MarketFeedCode	InstrumentGroupCode
QS0011146873	CAC3S	CAC 40 X3 SHORT GR	38	62	82
